प्रमुख सचिव

पृष्ठभूमि

नेपालको संविधान २०७२ अनुसार

- राज्यको निर्दिष्ट सिद्धान्त, नीति तथा दायित्व अन्तरगत विकास सम्बन्धी नीतिमा "क्षेत्रीय सन्तुलन सहितको समावेशी आर्थिक विकासका लागि क्षेत्रीय विकासको योजना अन्तर्गत दिगो सामाजिक आर्थिक विकासका रणनीति र कार्यक्रमहरू तर्जुमा गरी समन्वयात्मक तवरले कार्यान्वयन गर्ने" भनि उल्लेख भएको,
- राज्यको संरचना र राज्यशक्तिको बाँडफाँड अन्तर्गत नेपालको राज्य शक्तिको प्रयोग संघ, प्रदेश र स्थानीय तहले गर्ने व्यवस्था भएको,
- राज्यशक्तिको बाँडफाँड सम्बन्धमा अनुसूची-६ मा उल्लेखित प्रदेशको एकल अधिकारहरू मध्ये बुँदा १२ मा प्रदेश लोकमार्ग पनि उल्लेख भएको,

ले सर्दा मधेश प्रदेशको लागि प्रदेश लोकमार्गको वैज्ञानिक व्यवस्थापनको लागि यस "प्रादेशिक सडक संजाल गुरु योजना तथा प्राथमिकतामा आधारित लगानी योजना" तयार गरिएको छ।

Background

In the Constitution of Nepal 2015

- Because, under the Directive Principles, Policies and Obligations of the Province, it has been provisioned in the Policies relating to development that**

To formulate sustainable socio-economic development strategies and programs under the regional development plan for inclusive economic development with regional balance, and implement them in a coordinative manner,

- Because, regarding the Structure of Province and Distribution of Province Power, it has been provisioned that**

The Federation, Province and Local levels shall exercise the power of Province of Nepal pursuant to this Constitution and law.

- Because, in the Distribution of Province's Power, as mentioned in Annex 6:**
Exclusive Rights of the Province, on 12 number, the rights of the Provincial Roads are with the province

Madhesh Province has prepared a **Provincial Roads Network Master Plan and Priority Investment Plan** for the scientific management of the Provincial roads.

संजय प्रसाद साह

प्रमुख सचिव

प्रमुख सचिव

Foreword

As stated in the Constitution of Nepal, we, the Government of Madhesh Pradesh initiated the identification of the provincial roads network, so that the available resources spent correctly in both political as well as constitutional sense. This is our great pleasure to finalize the Provincial Roads Network (PRN) of our Madhesh Pradesh as envisaged in the Provincial Roads Act of the Madhesh Pradesh.

For the proper management of the identified roads of the network, it is essential to formulate a medium-term Priority Investment Plan (PIP) based on prioritization and the long-term vision of the province regarding the roads network.

Prioritization is a key element in a situation of needing to do more with lesser resources. This Provincial Roads Network Master Plan includes identification, categorization of the Provincial Roads as well as 5 years Investment Plan based on prioritization. This PRNMP has covered investment requirements and funding gaps. We believe that this PRNMP will help us to initiate a strategic development based on economic growth resulting from enhanced accessibility to socio economical centres.

And, this PRNMP also serves for the purpose of dialogue with various development partners interested in transport infrastructures

We like to thank the Swiss Agency for Development and Cooperation (SDC) for providing technical assistance in preparing this PRNMP.

Honorable Chief Minister
Government of Madhesh Province

मन्तव्य

नेपालको संविधानमा उल्लेख भएबमोजिम हामी, मधेश प्रदेश सरकारले, उपलब्ध स्रोत साधनलाई राजनीतिक र संवैधानिक दुवै हिसाबले सही ढंगले खर्च होस् भन्ने अभिप्रायले प्रादेशिक सडक सञ्जालको पहिचानको कार्य अघि बढाएको थियो । प्रादेशिक सडक ऐनमा परिकल्पना गरिए अनुसार हाम्रो मधेश प्रदेशको प्रादेशिक सडक सञ्जालको पहिचान भएकोमा हामीलाई खुशी लागेको छ ।

सञ्जालका पहिचान गरिएका सडकहरूको उचित व्यवस्थापनका लागि प्रदेशको दीर्घकालीन दृष्टिकोण सहितको मध्यकालीन प्राथमिकतामा आधारित लगानी योजना पनि तर्जुमा गर्न आवश्यक छ ।

सधैँ जसो न्यून श्रोतमा धेरै गर्न पर्ने स्थितिमा प्राथमिकीकरण एक प्रमुख उपाय हो । यस प्रादेशिक सडक सञ्जाल गुरुयोजनामा प्रादेशिक सडकको पहिचान, वर्गीकरण र प्राथमिकताका आधारमा ५ वर्षे लगानी योजना समावेश छ । यो PRNMP ले लगानी आवश्यकताहरू र कोषको कमीलाई पनि समेटेको छ । हामी विश्वास गर्छौं कि यो PRNMP ले हामीलाई सामाजिक आर्थिक केन्द्रहरूमा व्यवस्थित पहुँचको परिणाम स्वरूप आर्थिक वृद्धिमा आधारित रणनीतिक विकास सुरु गर्न मद्दत गर्नेछ ।

र, यो PRNMP ले यातायात पूर्वाधारमा रुचि राख्ने विभिन्न विकास साझेदारहरूसँग वार्तालापको उद्देश्यका लागि पनि काम गर्दछ ।

हामी यस प्रादेशिक सडक सञ्जाल गुरु योजना तयार गर्न प्राविधिक सहयोग प्रदान गर्ने स्वीस सरकार विकास नियोगलाई पनि धन्यवाद दिन चाहन्छौं ।

प्रमुख सचिव

FOREWORD

As provisioned in the Constitution of Nepal, the Government of Madhesh Province initiated the process of identifying the Provincial Road Network to ensure that the available resources are utilized in a politically and constitutionally appropriate and effective manner.

We are pleased to announce the successful identification of the Provincial Road Network of Madhesh Province, as envisioned in the Provincial Roads Act.

To ensure proper management of the roads identified within the network, it is essential to formulate a medium-term investment plan based on prioritization and aligned with the long-term vision of the province.

We continuously operate in a context where we must achieve the maximum with limited resources. In such a situation, prioritization becomes an effective strategy. This Provincial Road Network Master Plan (PRNMP) includes the identification, classification, and prioritization of provincial roads, along with a five-year investment plan.

The PRNMP not only estimates investment requirements but also addresses potential funding gaps. We believe this plan will contribute to strategic development based on economic growth by enhancing access to socio-economic centers across the province.

Furthermore, this master plan will serve as a strong foundation for dialogue and collaboration with various development partners interested in transport infrastructure.

We express our sincere gratitude to the Swiss Agency for Development and Cooperation (SDC) for providing technical assistance in the preparation of this important master plan.

Honorable Minister

Ministry of Physical Infrastructure Development
Government of Madhesh Province

मन्तव्य

नेपालको संविधानमा गरिएको व्यवस्थानुसार, मधेश प्रदेश सरकारले उपलब्ध स्रोत-साधनको राजनीतिक तथा संवैधानिक दृष्टिले उचित र प्रभावकारी उपयोग होस् भन्ने उद्देश्यले प्रादेशिक सडक सञ्जालको पहिचान प्रक्रिया अघि बढाएको हो।

प्रादेशिक सडक ऐनमा परिकल्पना गरिए अनुसार, मधेश प्रदेशको प्रादेशिक सडक सञ्जालको पहिचान सम्पन्न भएकोमा हामी अत्यन्त हर्षित छौं।

सञ्जालभित्रका पहिचान गरिएका सडकहरूको उचित व्यवस्थापन गर्न तथा प्रदेशको दीर्घकालीन दृष्टिकोण अनुरूप मध्यकालीन प्राथमिकतामा आधारित लगानी योजना तर्जुमा गर्नु अत्यावश्यक छ।

हामी सधैं न्यून स्रोत-साधनमा अधिकतम उपलब्धि हासिल गर्नुपर्ने परिस्थितिमा रहन्छौं। यस्तो अवस्थामा, प्राथमिकीकरण एक प्रभावकारी उपाय हो। यस प्रादेशिक सडक सञ्जाल गुरुयोजनामा प्रादेशिक सडकहरूको पहिचान, वर्गीकरण तथा प्राथमिकताका आधारमा आगामी पाँच वर्षको लगानी योजना समावेश गरिएको छ।

यो "PRNMP" ले आवश्यक लगानीको अनुमान मात्र होइन, स्रोत अभावका सम्भावित पक्षहरूलाई समेत समेटेको छ। हामी विश्वास गर्छौं कि यस योजनाले सामाजिक तथा आर्थिक केन्द्रहरूमा पहुँच विस्तार गर्दै प्रदेशको समग्र आर्थिक बृद्धिमा आधारित राजनीतिक विकासलाई टेवा पुऱ्याउनेछ।

साथै, यो गुरुयोजना यातायात पूर्वाधारमा चासो राख्ने विभिन्न विकास साझेदारहरूसँग संवाद र सहकार्यका लागि एउटा सशक्त आधार बनेछ।

यस महत्वपूर्ण गुरु योजना निर्माणका क्रममा प्राविधिक सहयोग उपलब्ध गराउने स्वीस सरकारको विकास सहयोग नियोगप्रति हामी हार्दिक आभार प्रकट गर्दछौं।

FOREWORD

It is my great pleasure to introduce this Provincial Roads Network Master Plan (PRNMP) of Madhesh Province. I believe that this document will be helpful in backstopping to Provincial Transport Infrastructure Sector through sustainable planning, resources mobilization, implementation and monitoring of the road sub-sector development.

The document is anticipated to generate substantial employment opportunities for rural people through increased and reliable accessibility in on-farm and off-farm livelihood diversification, commercialization and industrialization of agriculture sector. In this context, provincial road sector will play a fundamental role to strengthen and promote overall economic growth of this province through established and improved year round transport services reinforcing intra and inter-provincial linkages.

Therefore, it is most crucial in executing provincial road networks in a planned way as per the Provincial Roads Network Master Plan (PRNMP) by considering the framework of available resources in Provincial Government comprising both internal and external sources. Viewing these aspects, MoPID, Madhesh Province has prepared the PRNMP by focusing most of the available resources into upgrading and maintenance of the existing road networks. This document is also been assumed to be helpful to show the province road situations to the donor agencies through federal government towards generating needy resources through basket fund approach.

Furthermore, this document will be supportive in avoiding pervasive duplication approach in resources allocation under the provincial roads network development sector of this province.

We like to thank the Swiss Agency for Development and Cooperation (SDC) for providing technical assistance in preparing this PRNMP.

Acting Province Secretary
Ministry of Physical Infrastructure Development
Government of Madhesh Province

मन्तव्य

मधेश प्रदेशको प्रादेशिक सडक सञ्जाल गुरु योजना (PRNMP) प्रस्तुत गर्न पाउँदा मलाई अत्यन्त खुशी लागेको छ। यो दस्तावेज दिगो योजना, स्रोतहरूको संकलन, कार्यान्वयन र सडक उप-क्षेत्रको विकासको अनुगमनमार्फत प्रादेशिक यातायात पूर्वाधार क्षेत्रलाई मद्दत गर्ने विश्वास छ।

यस दस्तावेजले ग्रामीण जनताका लागि खेतीकिसानीमा आधारित जीविकोपार्जनमा विविधता, व्यवसायीकरण र कृषि क्षेत्रको औद्योगिककरणमा वृद्धि र विध्वंसनीय पहुँचको माध्यमबाट महत्वपूर्ण रोजगारका अवसरहरू सिर्जना गर्ने अपेक्षा गरिएको छ। यस सन्दर्भमा, प्रादेशिक सडक क्षेत्रले वर्षभरि सञ्चालन हुने यातायात सेवाहरूको स्थापना र सुधार गरेर यो प्रदेशको समग्र आर्थिक वृद्धिमा सुदृढीकरण र प्रवर्द्धन गर्न आधारभूत भूमिका खेल्नेछ।

यसैले, प्रादेशिक सडक सञ्जाल गुरु योजनाको (PRNMP) अनुरूप योजनाबद्ध तरिकामा प्रादेशिक सडक सञ्जाल कार्यान्वयन गर्न अत्यन्त महत्वपूर्ण छ, जुन प्रादेशिक सरकारले उपलब्ध गराएको आन्तरिक र बाह्य स्रोतहरूको दौडालाई ध्यानमा राखेर गरिनेछ। यी पक्षहरूलाई ध्यानमा राख्दै, मधेश प्रदेश, भौतिक पूर्वाधार विकास मन्त्रालयले PRNMP तयार गरेको छ, जसले विद्यमान सडक सञ्जालको स्तरोन्नति र मर्मतमा उपलब्ध स्रोतहरूको अधिकतम उपयोगमा ध्यान दिएको छ।

यो दस्तावेजले संघीय सरकारमार्फत दातृ निकायहरूलाई प्रदेशका सडकहरूको अवस्थाहरू देखाउन र "Basket Fund" दृष्टिकोणमार्फत आवश्यक स्रोतहरू जुटाउन मद्दत गर्ने अपेक्षा गरिएको छ।

अन्ततः, यस दस्तावेजले प्रदेशका सडक सञ्जाल विकास योजनाहरूमा स्रोतहरूको वितरणमा दोहोरिने सम्भावनाबाट बच्न सहयोग गर्नेछ।

हामी यस प्रादेशिक सडक सञ्जाल गुरु योजना तयार गर्न प्राविधिक सहयोग प्रदान गर्ने स्वीस सरकार विकास नियोगलाई पनि धन्यवाद दिन चाहन्छौं।

1 INTRODUCTION

1.1 Background

Madhesh Pradesh is a province in the southeastern region of Nepal that was formed based on the Constitution of Nepal (2072 BS / 2015 AD). It is Nepal's second most populous province and smallest province by area. It borders Koshi Province to the east, Province No. 3 to the north, and India to the south. It has an area of 9,661 km² (3,730 sq mi) with a population of 6,126,288 per the 2021 Census of Nepal, making it most densely populated province of Nepal.

The Koshi River and Koshi Tappu Wildlife Reserve acts as provincial demarcation border with Koshi Province in the east, and the demarcation line between Chitwan National Park and Parsa National Park (previously Wildlife Reserve) acts as provincial demarcation border with Bagmati Province in the west.

The capital city, a sub-metropolitan city of Janakpur, also known as Janakpurdham, is a centre for religious and cultural tourism. It is also thought to have been the capital of the Videha dynasty that ruled Mithila region in ancient times. The first urban planned municipality of Nepal, Rajbiraj, is also the oldest municipality of the Terai belt of Nepal. The town is believed to have been named after the ancient Rajdevi temple, which dates back to the 1700s. The metropolitan city of Birgunj is an economically important industrial centre and the only metropolitan city in the province.

Madhesh Pradesh includes 8 districts from Saptari District in the east to Parsa District in the west. The majority of the province's population speaks Maithili, Bhojपुरी, Bajjika and Nepali. Province 2 has 32 parliamentary seats and 64 Provincial Assembly seats. Janakpur City is the interim capital. It borders the Indian states of Bihar to the south and Province 1 to north east and Province 3 to the north west. There is one metropolitan city Birgunj, three sub-metropolitan cities: Janakpur, Kaliaya and Jitpur Simara, 73 municipalities and 59 rural municipalities.

Previously the roads of the country were categorized as Strategic Roads Network / SRN (National Highways and Feeder Roads) and Local Roads Networks / LRN (District Roads Core Network and Village Roads). Department of Roads (DoR) was looking after SRN and then District Development Committee (DDCs with technical support from then District Technical Office) were looking after LRNs.

There were many bilateral / multilateral supported projects and programmes (DRSP, DRILP, RAIDP, SNRTP, RCAIP, RAP etc.) engaged in the development of LRNs. These programmes were normally coordinated in the centre by then DoLIDAR / MoFALD.

After the promulgation of the "Constitution of Nepal 2072", all the 3 governments have been given the jurisdiction (exclusive rights) of the roads. The roads have been now classified as

- Federal Highways under Federal Government
- Provincial Highways under Provincial Government
- Local Roads under Local Level

To manage the provincial roads, the State needs legal basis and for this the Madhesh Pradesh has already enacted the "Provincial Roads Act 2076 BS" also. This Provincial Roads Network Master Plan (PRNMP) has been prepared based on the provisions made therein.

1.2 Objectives

It is essential to formulate sustainable socio-economic development strategies and programmes, under the Provincial Development Plan, for inclusive economic development with regional balance and implement them in a coordinated manner. And roads network plays the basic and essential roles in overall socio-economic development of the province

As mentioned in Annex 6 of the Constitution and as defined by the Provincial Roads Act, one of the main objectives of the PRNMP is to identify and categorize the roads in the provincial roads network.

The objective of the PRNMP is also to make a medium-term investment plan based on the prioritization of the roads in the PRN. It aligns with the first periodic plan of the province also. It has been stated in the 'Chapter 6.1 Roads and Transport' of the periodic plan that one of the strategies will be "developing safe roads network based on master plan and with modern infrastructure".

So, this Provincial Roads Network Master Plan (PRNMP) has been prepared with the following objectives:

- Identification of roads that need to be taken under the jurisdiction of the province
- Classification of the identified roads
- Prioritization of roads based on objectively verifiable criteria
- Setting of 'technical requirements of PRN' and 'medium term targets'
- Estimation of budgetary requirements, predicted gaps and finally a 'Priority Investment Plan'

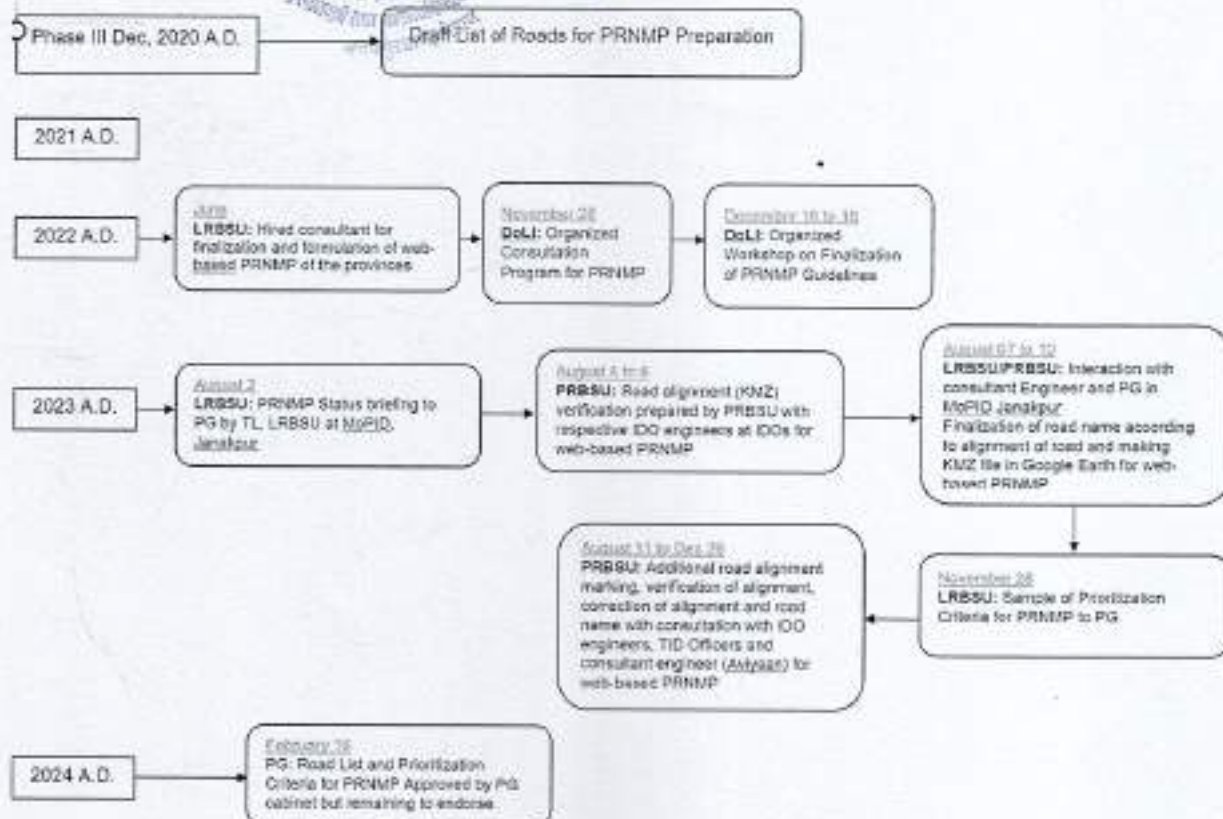

1.3 Methodology

The initiative for making of PRNMP started in 2020 AD, with the technical assistance of Swiss Agency for Development and Cooperation (SDC) during the 3rd phase of the Local Roads Bridge Programme (LRBP-III).

In the 4th and the last phase of Motorable Local Roads Bridge Programme (MLRBP - IV) also, the process continued. There have been many rounds to interactions and consultative meetings in the bureaucratic management level as well as with the political leaderships also.

संजय प्रसाद साह
नि. प्रदेश सचिव

The summary of the technical steps is;

- Collection of all the available roads network data from all the possible sources
- Exclusion of the National Highway already identified and declared by the cabinet of the federal government.
- Identification of the possible roads to be included in the PRN
- Many rounds of consultations and interactions

- Formulation of Prioritization Criteria
- Priority Ranking of the roads identified and categorized as PRN
- Grouping of roads based on priority

- Setting up of medium term (5 years) technical targets for the roads in PRN.
- Budgetary estimation for the achievement of the targets with prediction of available budget and funding gaps.

The details are in respective Chapters.

संजय प्रसाद साह
नि. नि. नि. नि. नि. नि.

2 PREPARATION OF PRNMP

2.1 Road Classification

Classification is the process of organizing roads into a hierarchy based on the type of service they are intended to provide. It helps channelize travel within the network in a logical and efficient manner. Roads within each class are expected to offer a similar level of service. Generally, roads of the same class adhere to common objectives, standards, and intervention levels. Countries manage their road systems through both administrative and functional classifications. Administrative classification determines road ownership, while functional classification addresses technical requirements, maintenance practices, and influences the administrative classification.

2.1.1 Administrative Road Classification

The administrative classification of roads is designed to assign national significance and determine the level of government responsible for their overall management and financing methods. Based on the present administrative division of Nepal, the following classification of roads is in practice:

i. National Highway

These are the Road Network managed by the Federal Government and has defined 80 highways. National Highways are the primary roads that connect the East to the West and the North to the South of the nation. They cater to a significant portion of long-distance travel, offering consistently higher travel speeds and facilitating inter-community mobility. These highways serve as the main arterial routes traversing the entire country.

ii. Provincial Road Network

The road network under the jurisdiction of provincial governments includes the provincial highways and provincial roads. These roads form an intermediate layer between the national highways and local roads, supports regional development by facilitating transportation, boosting local economies, and enhancing access to essential services. The network improves connectivity, reduces transportation costs, and contributes to tourism by providing access to cultural and natural attractions within the provinces.

iii. Local Road Network

Road network under the jurisdiction of Local Government which includes urban and rural roads within a municipality. These roads link villages, towns, and small urban centres to provincial roads and national highways, ensuring broad transportation access. They facilitate the movement of goods, reduce transportation costs, and improve economic opportunities. Additionally, local roads provide essential access to healthcare, education, and government facilities, while promoting social cohesion and community integration.

2.1.2 Functional Road Classification

Functional classification is the process of grouping roads based on the services they are intended to provide. Roads are designed and constructed according to their expected functions. This concept defines the role a particular roadway segment plays in facilitating traffic flow through the network. Roads are also classified based on the functional requirements. The NRS 2070 has specified the following classes of roads:

i. Class I Road

Class I roads are the highest standard roads, featuring divided carriageways and access control (expressways) with an anticipated average daily traffic (ADT) of 20,000 passenger car units (PCU) or more over a 20-year period. The design speed for these roads in plain terrain is set at 120 km/h, with divided lanes with a minimum of 4 lanes with shoulders and median.

ii. Class II Road

Class II roads are designed for an average daily traffic (ADT) of 5,000 to 20,000 passenger car units (PCU) over a 20-year period. The design speed for these roads in plain terrain is 100 km/h, with a minimum of 2 lanes with shoulders.

iii. Class III Road

Class III roads are designed for an average daily traffic (ADT) of 2,000 to 5,000 passenger car units (PCU) over a 20-year period. The design speed for these roads in plain terrain is 80 km/h, with 2 lanes with shoulders.

iv. Class IV Road

Class IV roads are designed for an average daily traffic (ADT) of less than 2,000 passenger car units (PCU) over a 20-year period. The design speed for these roads in plain terrain is 60 km/h, with single or intermediate lanes with shoulders.

Typical road sections under functional classification is shown in Figure 2-1.

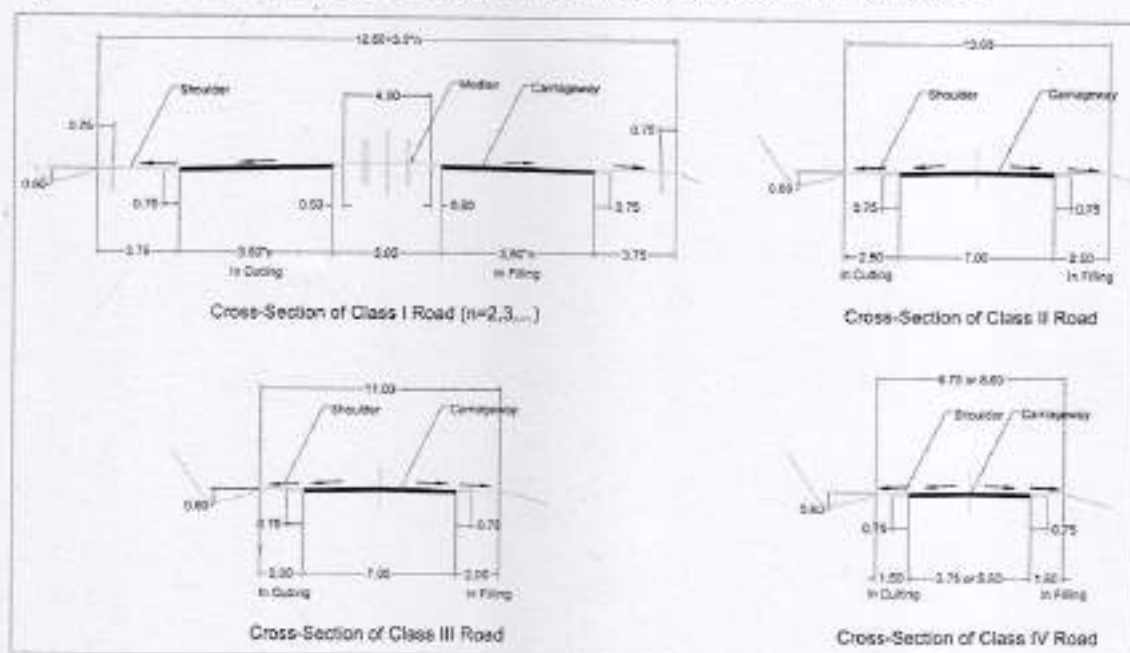

Figure 2-1: Typical Road Sections under Functional Classification

2.2 Data Collection

The PRNMP involves the collection of a wide range of collection of GIS data. All the collected data has been included in the website <https://prtmp.softavi.com/> which has been developed especially for PRNMP and contains the relevant data collected within the national boundary, and some screenshots of the website have also been included in Appendix G. The collected data have also been shown in maps attached in Appendix F. The data collected for PRNMP of Madhesh province have been discussed hereafter;

2.2.1 Road Network

The collection of road network data involves digitization of all roads, viz. National Highway (NH), Provincial Road Network (PRN), Local Road Network (LRN) and Strategic Urban Road (SUR), within the province boundary. For this, digitization at a scale upto 1:600 has been done from open sources like Google Earth, Bing images, Openstreet, etc available at the time of data collection. In addition, previous PRNMP and DTMP are also referred. Hence, all the roads within the province boundary available from multiple sources were collected in GIS format. The collected road network has also been used and shown in maps attached in Appendix D. Some sample maps of the digitized road network have been shown in Figure 2-2. These maps are also viewable and printable in the website <https://prtmp.softavi.com/>. In addition, the website can also be used to download the shapefiles and list of the road network data.

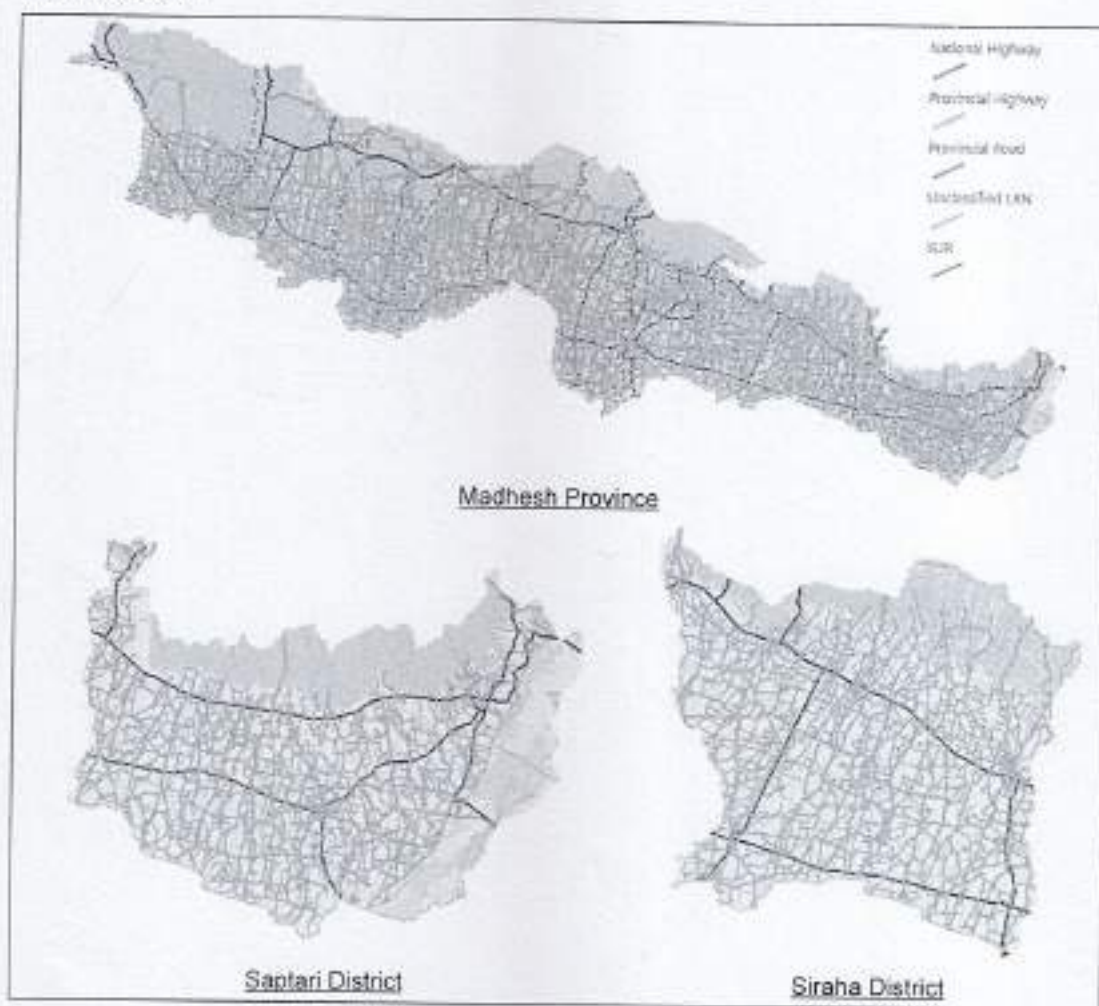

Figure 2-2: Map of Digitized Road Network

The details of road network digitized within the province at present has been shown in Figure 2-3.

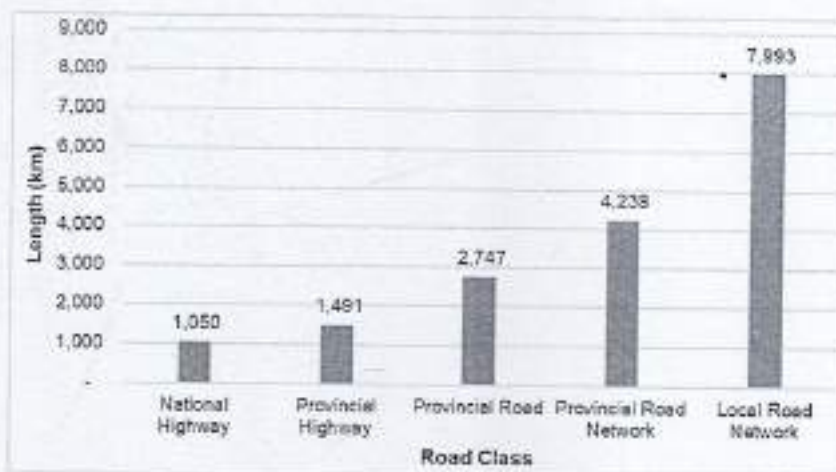

Figure 2-3: Road Network

The distribution of the digitized road network across districts of the province boundary has been shown in Figure 2-4. Siraha has the highest total road length at 2125.3 km (16%), largely due to its extensive network of local roads (1444.1 km). Sarlahi and Saptari follows closely with a total road length of 1917.2 km (14%) and 1827.8 km (14%) respectively, having a more balanced distribution across NH, PRN, and LRN. Dhanusha has the Fourth highest total road length at 1725.8 km (13%), with a significant portion attributed to its national highways. Conversely, Parsa has the least total road length at 1306.7 km (10%), with its local roads contributing the most at 849.5 km. This data highlights the variation in road infrastructure across the districts, reflecting differing levels of development and infrastructure needs.

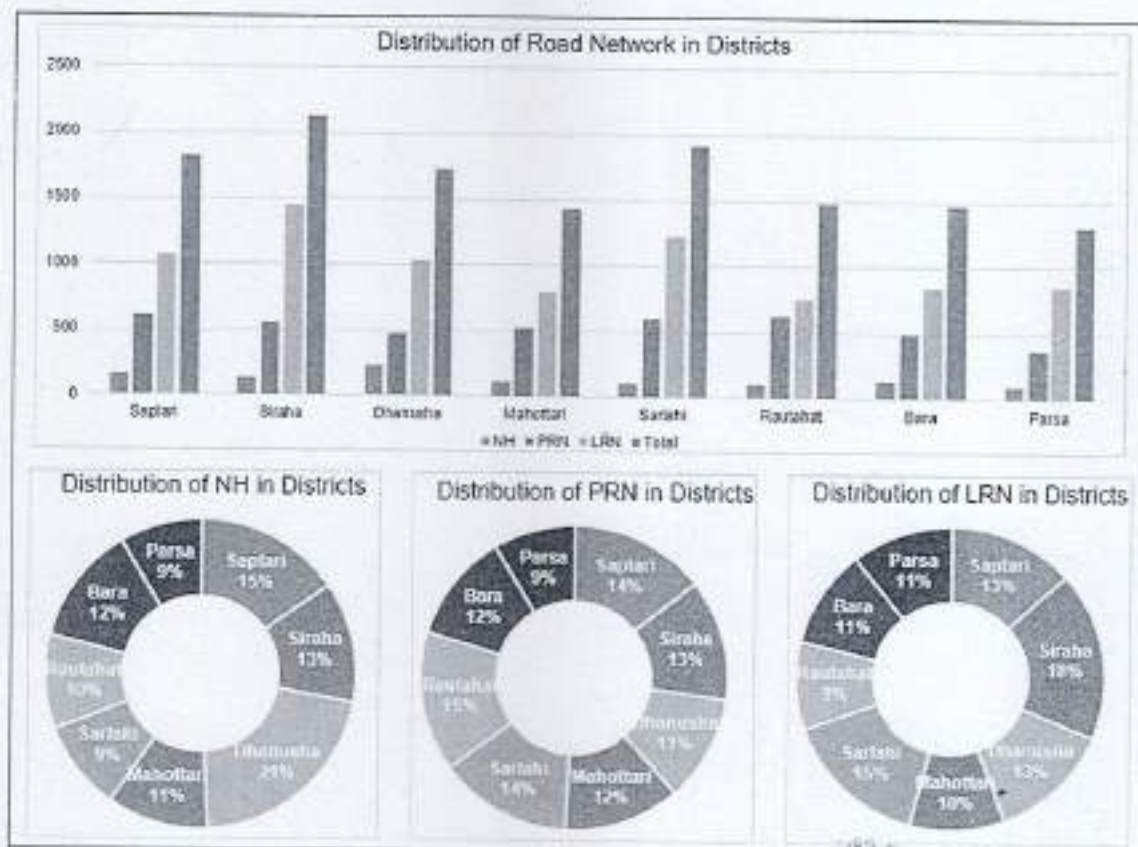

Figure 2-4: Distribution of Digitized Road Network in Districts

2.2.2 Government Centres

All government centres within the province boundary, viz. province headquarter, district headquarter, municipality centres and ward centres, were collected in GIS format from a number of sources and were also verified and added using Google satellite, Bing, Open Street, etc. A total of number of 343 government centres in GIS format have been collected within the province. These government centres have also been used and shown in maps attached in Appendix D. Some sample maps of government centres digitized within the province boundary has been shown in Figure 2-5. These maps are also viewable and printable in the website <https://prtmp.softavi.com/>.

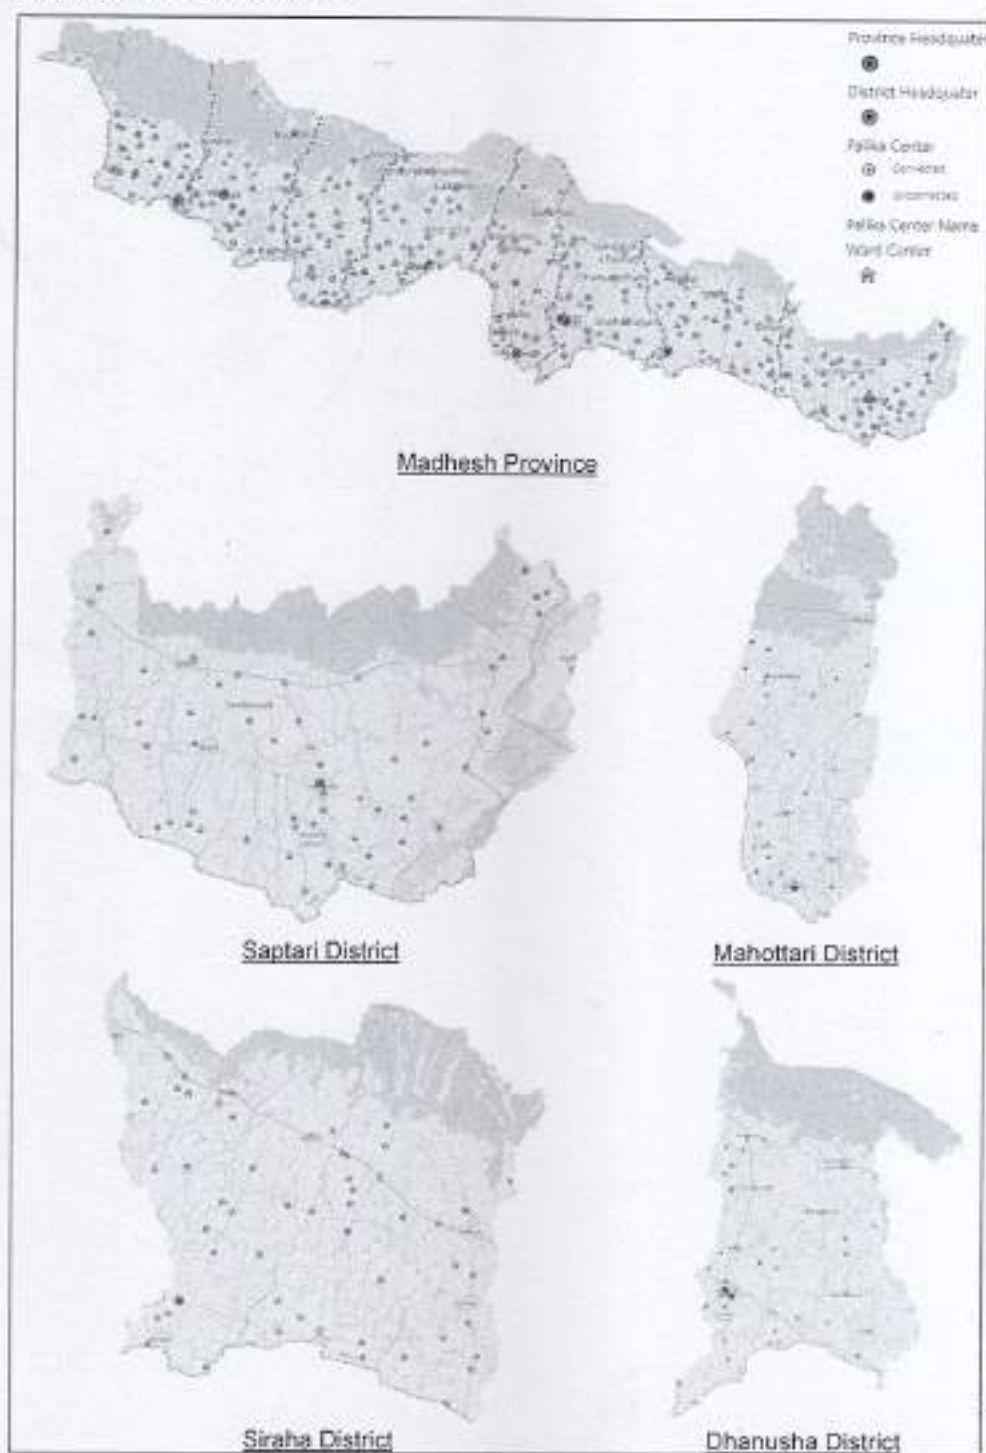

Figure 2-5: Government Centers within Madhesh Province

2.2.3 Social Centres

All social centres within the province boundary, viz. educational centres, health facilities, religious places and settlements, were collected in GIS format from a number of sources and were also verified and added using Google satellite, Bing, Openstreet, etc. A total of number of 9,570 social centres in GIS format have been collected within the province. These social centres have also been used and shown in maps attached in Appendix D. It is required to verify these by the PG. Sample maps of digitized social centres have been shown in Figure 2-6. These maps are also viewable and printable in the website <https://prtmp.softavi.com/>.

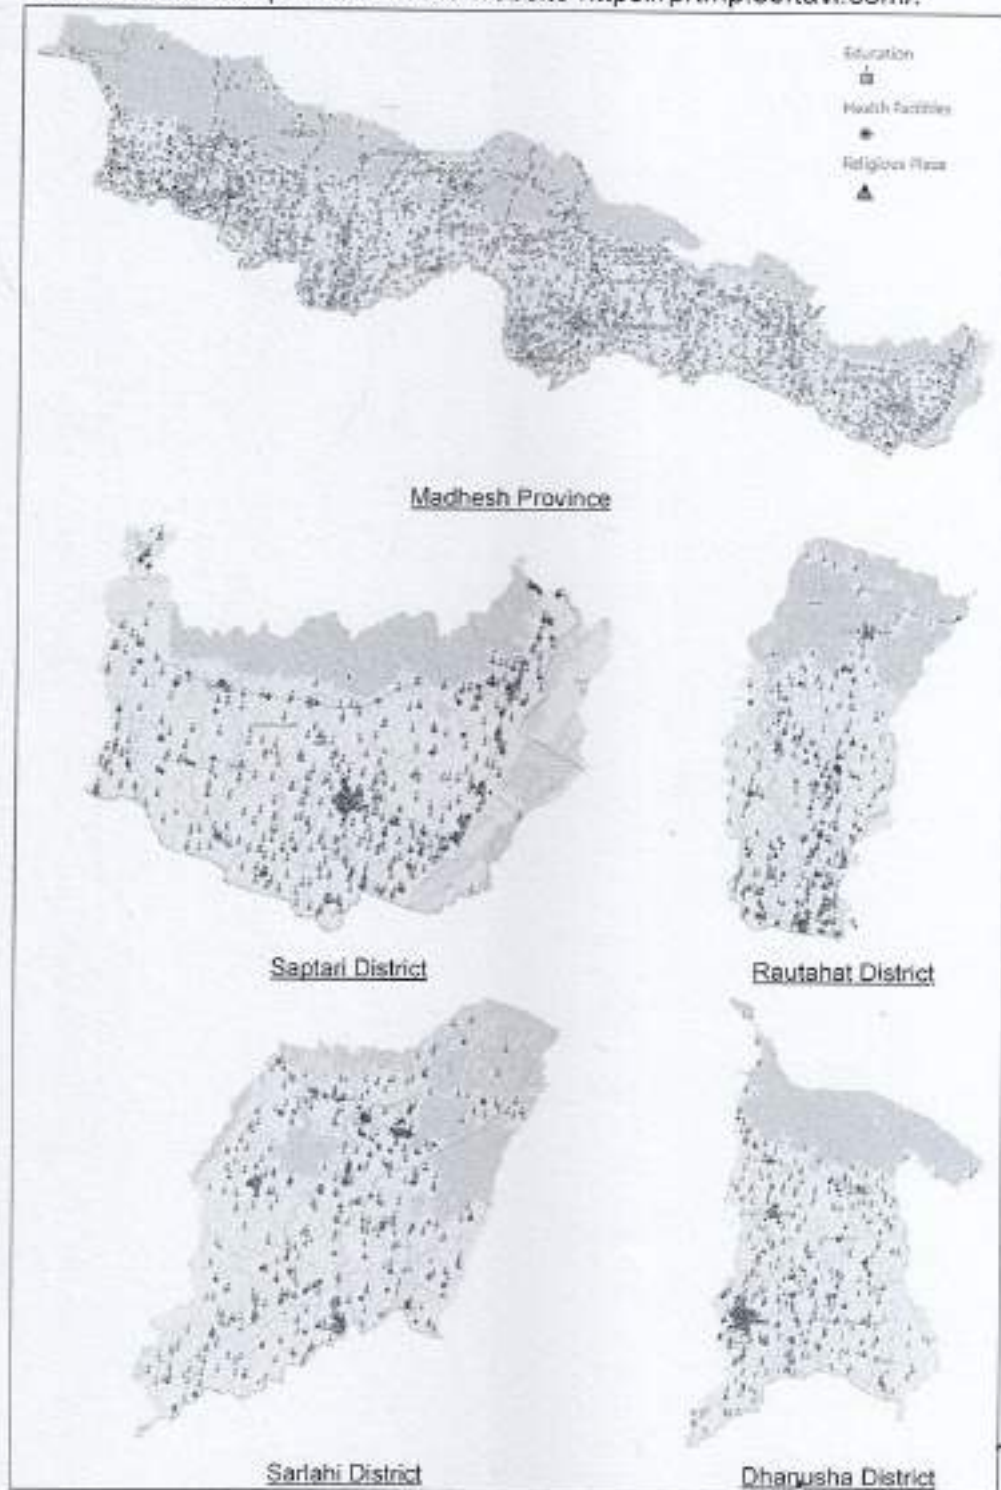

Figure 2-6: Digitized social centers

The details of number of social centres digitized within the province have been shown in Figure 2-7.

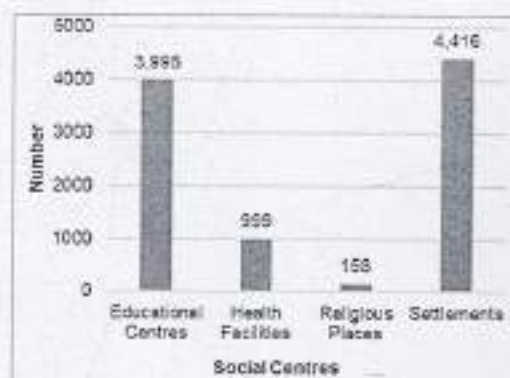

Figure 2-7: Number of Digitized Social Centres in Madhesh Province

The distribution of digitized social centres across districts within the province boundary have been shown in Figure 2-8. Educational centres are most abundant in Dhanusa (601), while Mahottari has the fewest (463). Health facilities are most numerous in Bara (148), with Saptari having the least (96). Regarding religious places, Parsa leads with 53, whereas Mahottari has only 6. Settlements are most prevalent in Sarlahi (699), while Parsa has the fewest (375).

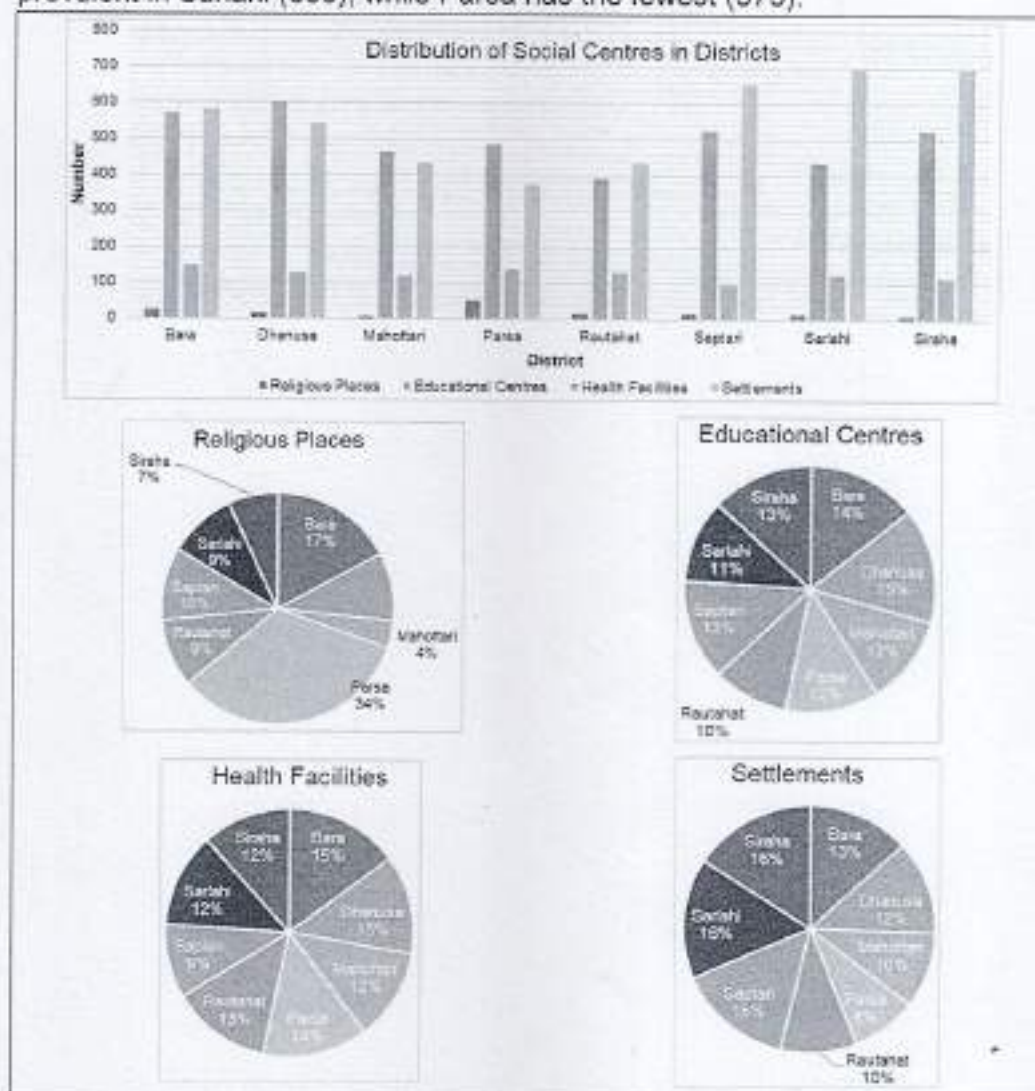

Figure 2-8: Distribution of Digitized Social Centres

2.2.4 Economic Centres

All economic centres within the province boundary, viz. hydropower, market centres, tourist attractions, industries, trade and transit centres, were collected in GIS format from a number of sources and were also verified and added using Google satellite, Bing, Openstreet, etc. A total of 377 economic centres in GIS format have been collected within the province boundary. These economic centres have also been used and shown in maps attached in Appendix D. It is required to verify these by the PG. Sample maps of digitized economic centres have been shown in Figure 2-9. This map is also viewable and printable in the website <https://prtmp.softavi.com/>.

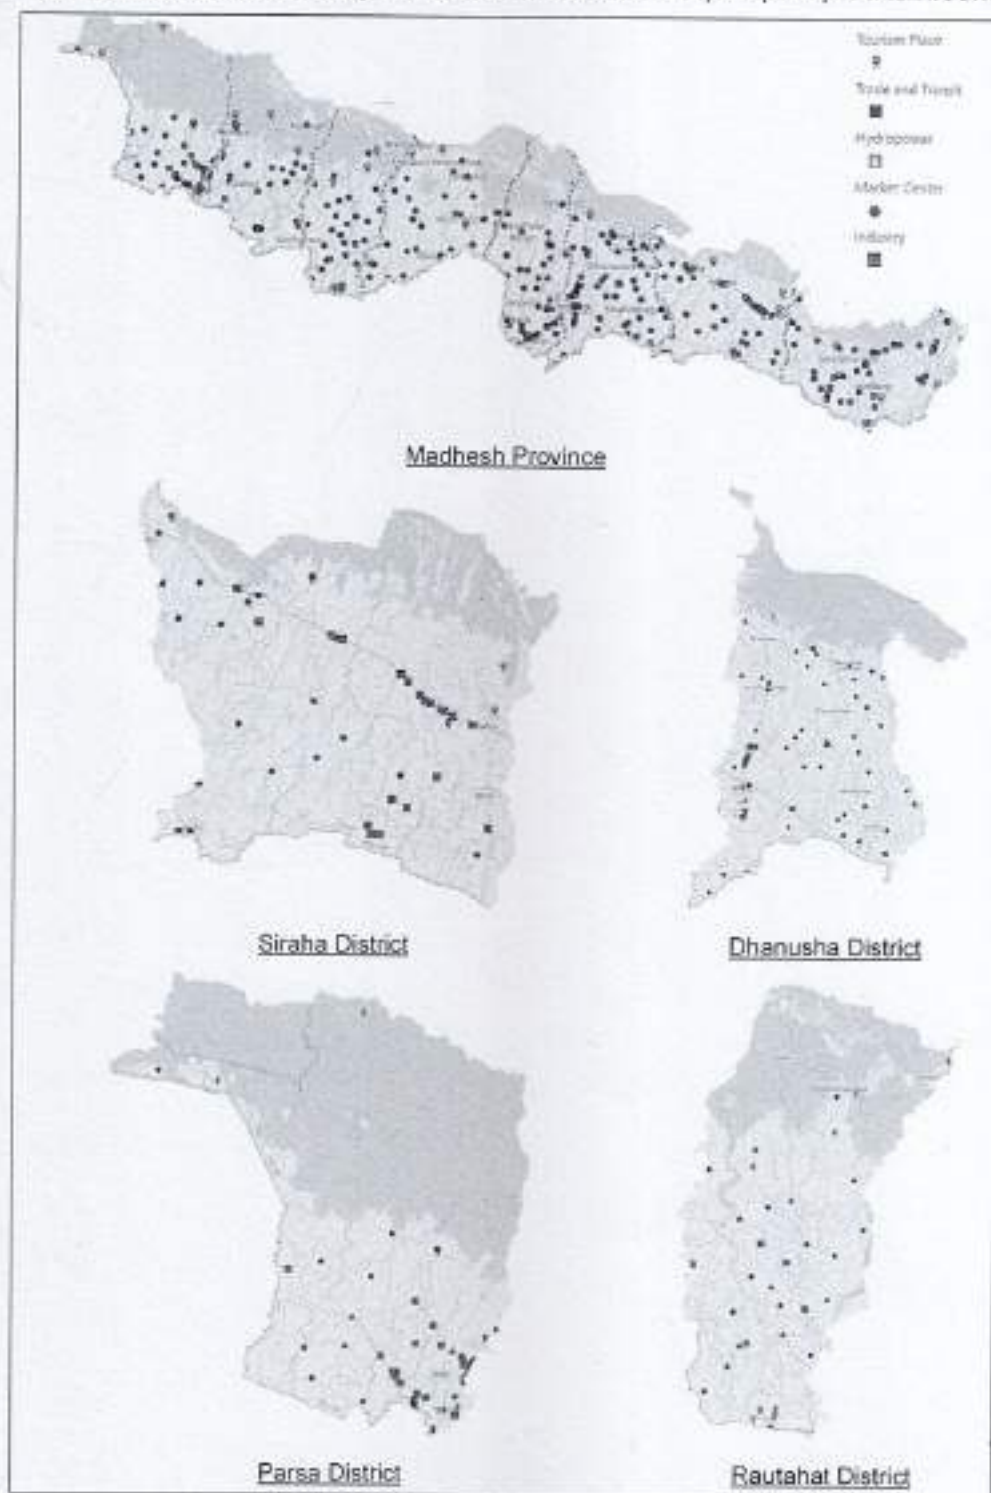

Figure 2-9: Economic Centres digitized

The details of number of economic centres digitized within the province boundary have been shown in Figure 2-10.

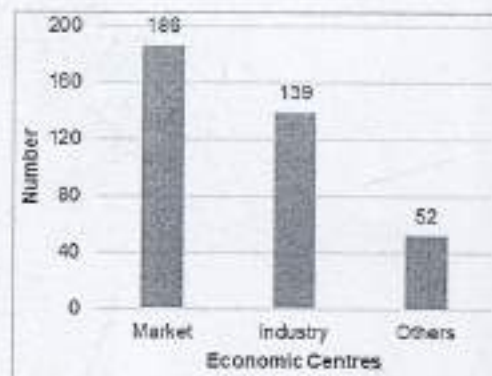

Figure 2-10: Number of Digitized Economic Centres in Madhesh Province

The distribution of digitized economic centres across districts within the province boundary have been shown in Figure 2-11. Saptari leads in the number of industries (32 no., 23% of total), followed closely by Parsa (31 no., 22% of total), while Sarlahi has no industries at all. Dhanusa has the highest number of market centres (42 no., 23% of total), significantly more than other districts, with Bara having the fewest (15 no., 8% of total). For other facilities, Parsa, Rautahat, and Siraha are tied with the highest number (10 no. each, 19% of total), while Mahottari has the fewest (3 no., 6% of total).

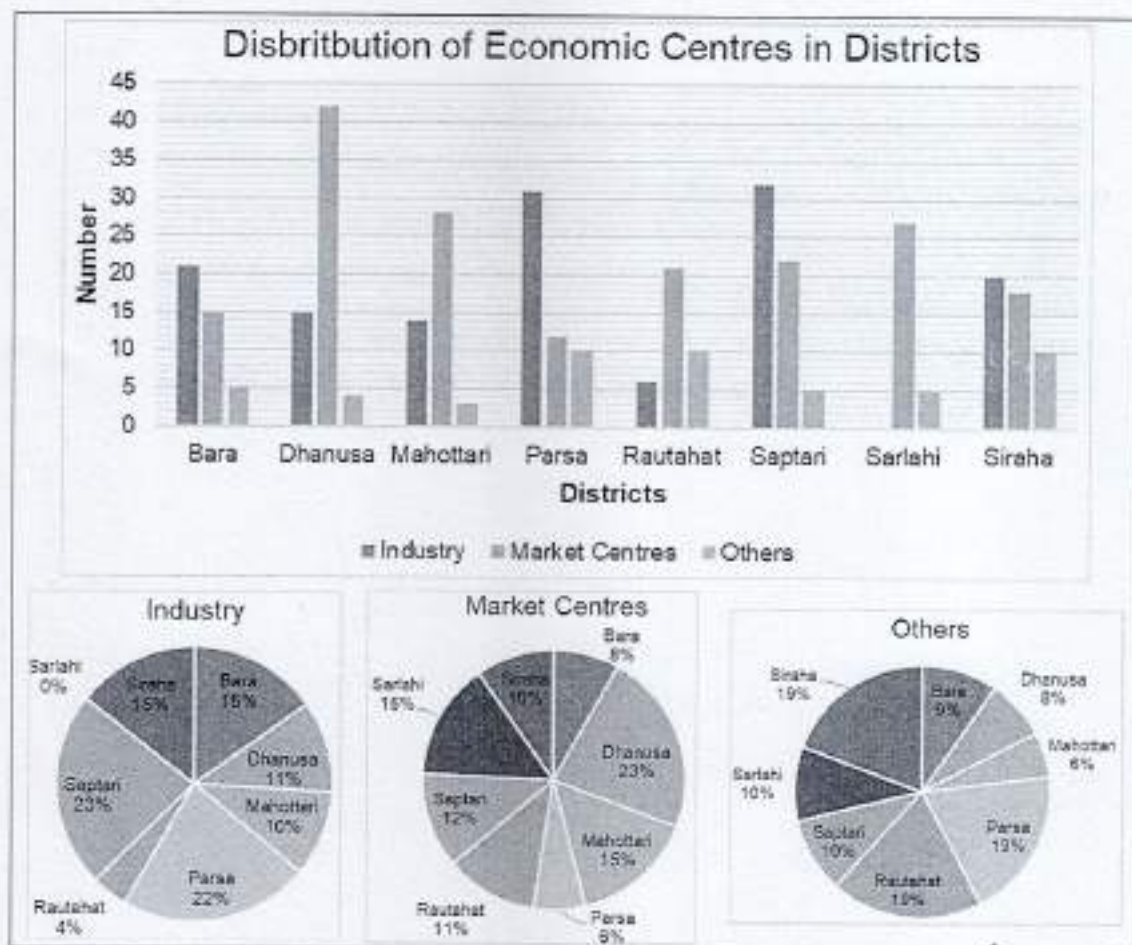

Figure 2-11: Distribution of Digitized Economic Centres

2.2.5 Population

Population data has been collected from the approach as discussed in Part 2: Prioritization of Roads in PRN. For this, all the houses as seen with the province boundary were digitized and sample maps have been shown in Figure 2-12.

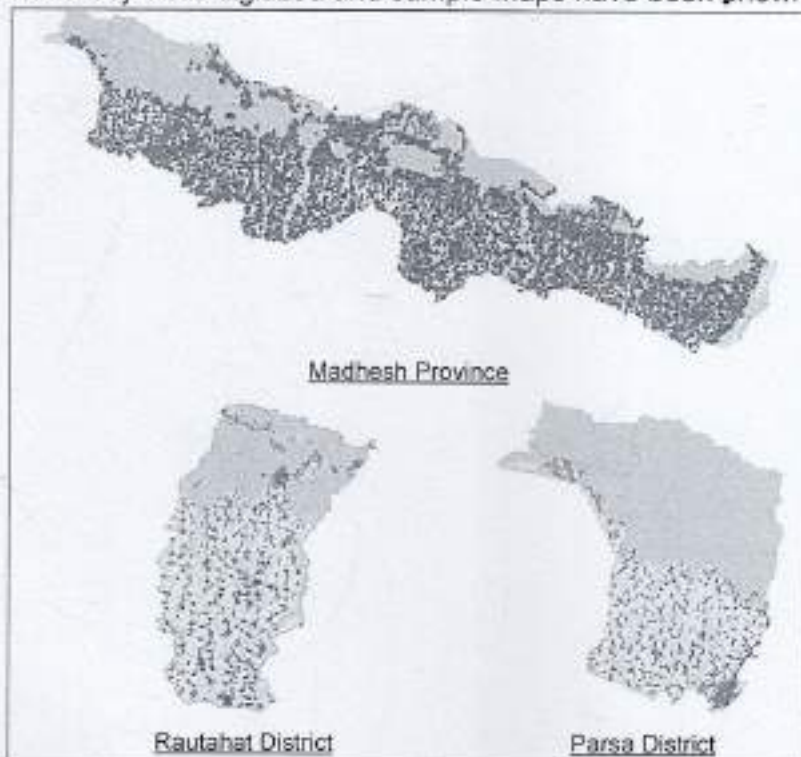

Figure 2-12: Digitized Houses

Sample maps of population density map calculated from the approach discussed in Part 2: Prioritization of Roads in PRN have been shown in Figure 2-13. These maps can be viewed and printed from the website <https://prtmp.softavi.com/>.

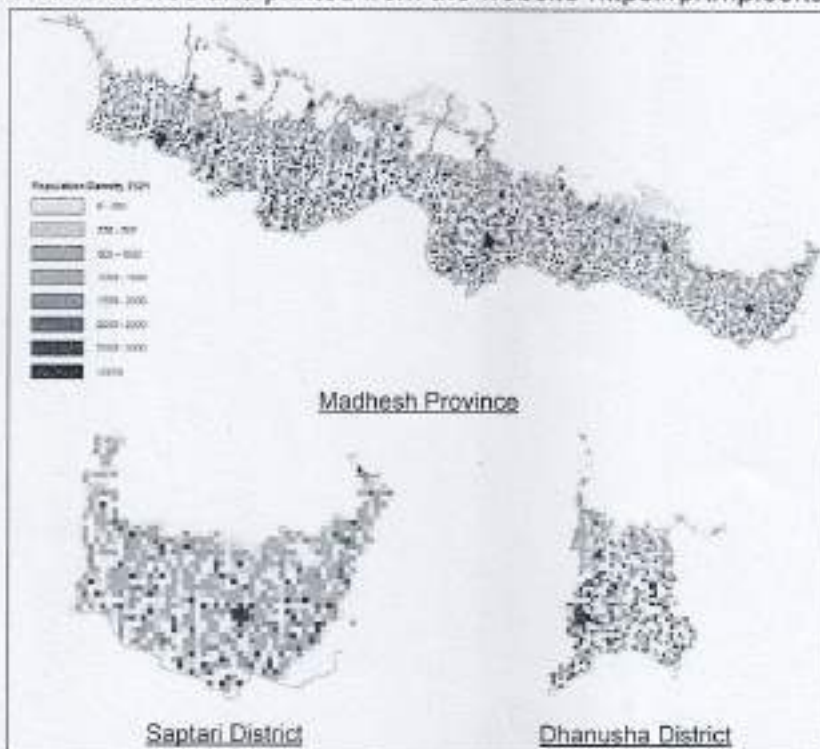

Figure 2-13: Population Density

2.2.6 Agricultural Area

The data on agricultural areas within the province boundary was sourced from ICIMOD (International Centre for Integrated Mountain Development) in 2021. ICIMOD is a regional center for learning and knowledge sharing among eight Hindu Kush Himalaya countries: Afghanistan, Bangladesh, Bhutan, China, India, Myanmar, Nepal, and Pakistan. Nepal's annual land cover data is produced by the National Land Cover Monitoring System (NLCMS) using Landsat remote-sensing data and a machine learning framework on the Google Earth Engine (GEE) platform, ensuring consistent land cover maps through a unified classification system. Some sample maps of land-cover as per ICIMOD, 2021 has been shown in Figure 2-14. The maps are also viewable and printable in the website <https://prtmp.softavi.com/>.

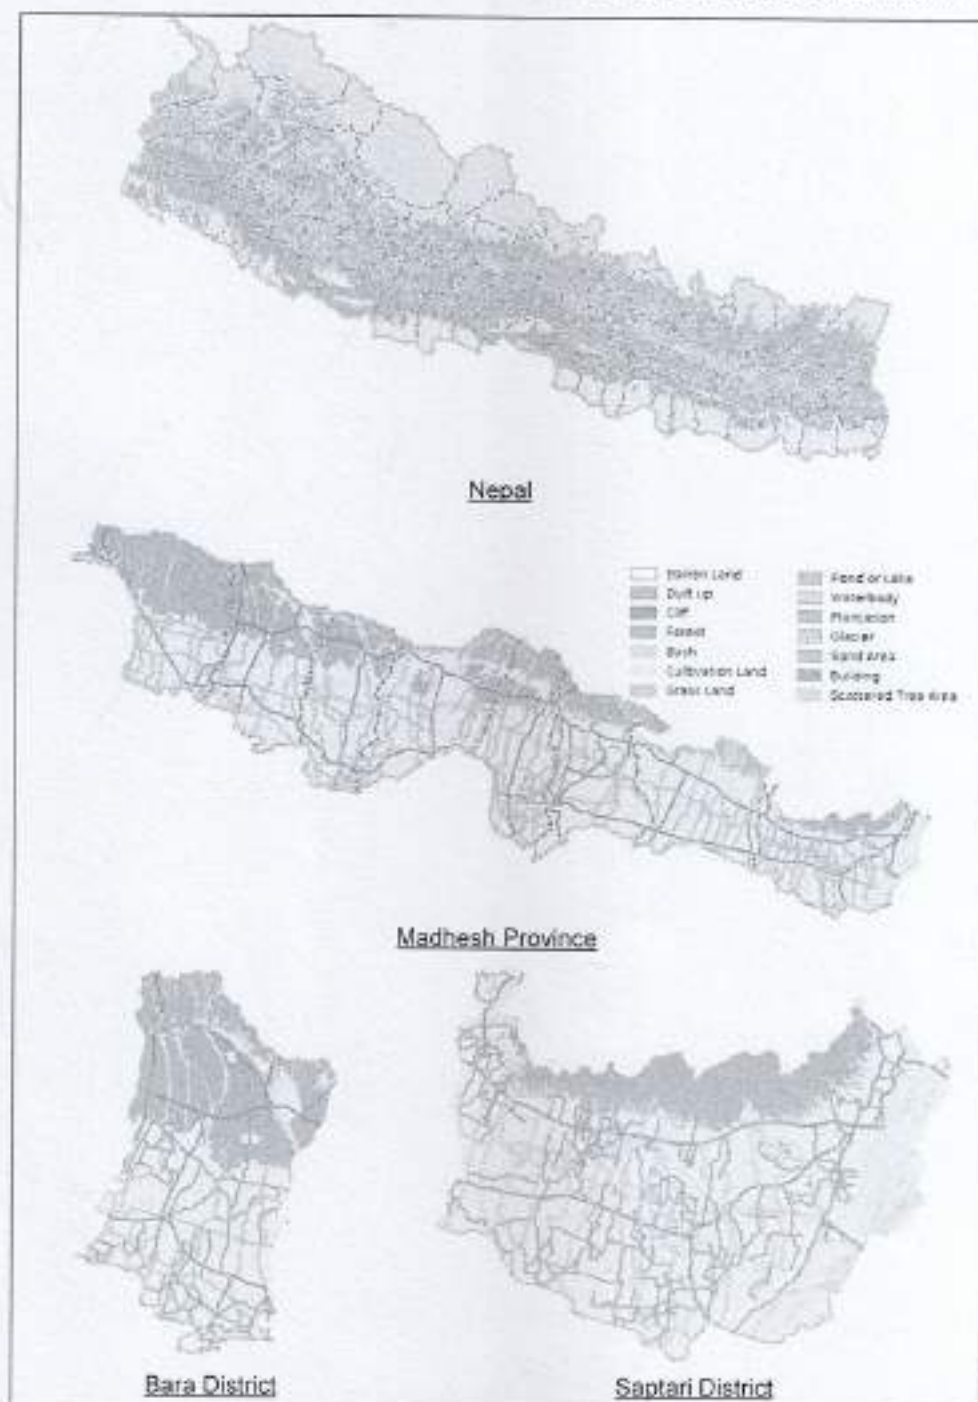

Figure 2-14: Land-cover Map by ICIMOD

2.2.7 Elevation Data

The elevation data of Nepal is taken from Shuttle Radar Topographic Mission (SRTM). The elevation data at 90m resolution is clipped to the Nepal boundary. The SRTM is an international research effort that obtained digital elevation models on a near-global scale from 56°S to 60°N, to generate the most complete high-resolution digital topographic database of Earth. The Shuttle Radar Topography Mission (SRTM) was flown aboard the space shuttle Endeavour February 11-22, 2000. The National Aeronautics and Space Administration (NASA) and the National Geospatial-Intelligence Agency (NGA) participated in an international project to acquire radar data which were used to create the first near-global set of land elevations. The SRTM elevation grid clipped in Nepal boundary is shown in Figure 2-15.

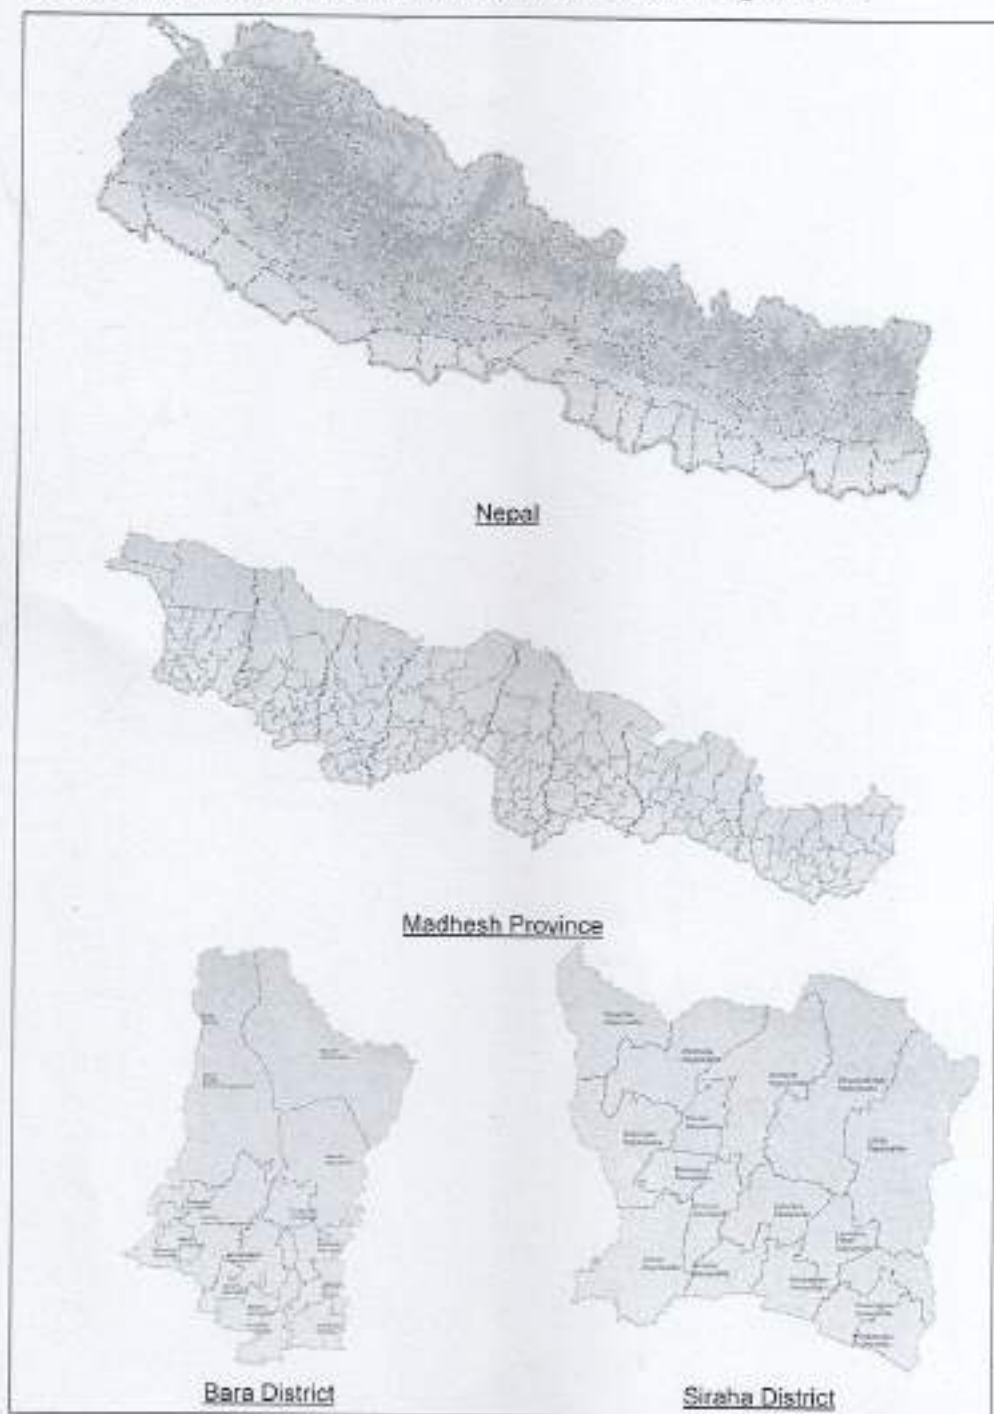

Figure 2-15: SRTM Elevation Grid

2.2.8 Inventory Data

Inventory data for road and bridges in the identified PRN is collected from Google satellite imagery for each road. The details of road inventory and bridge data have been included in Appendix B and Appendix C respectively and a summary has been discussed in section 2.3.3 and section 2.3.4 for road and bridge respectively. The PG needs to verify these.

2.2.9 Traffic Data

The PG needs to carry out the traffic survey for each road. In the present analysis, traffic volume is based on the population of the influence area of the road which may not be accurate.

2.3 Provincial Road Network

2.3.1 Categorization of Provincial Road Network

With the collected road data, the major task was to identify the road that will be included in the PRNMP excluding the National Highways. This was based on the criteria defined for the Provincial Highway and Provincial Road. Extensive consultation was held with the Province Government including Local Government and concerned stakeholders.

The provincial road is categorized into two sub-categories;

i. Provincial Highway

A Provincial Highway is a main road that connects district headquarters, important market areas, tourist destinations, or other significant locations with the provincial capital or National Highways (NH) within the province. Additionally, a provincial highway can link two or more national highways, connect multiple local governments, or be designated by the province as a provincial highway not included in the Federal Road Network (FRN). These highways are generally medium-volume roads.

A total of 54 roads links and 68 road sections of PH were identified within the province boundary totalling a length of 1491.364 Km. The list of PH identified within the province boundary is attached in Appendix A. The distribution of PHs in districts of Madhesh Province has been shown in Figure 2-16. Sarlahi has the longest PH network with 238 km (16%), followed by Saptari (222 km, 15%). Rautahat also has a substantial PH length of 209 km (14%). In contrast, Dhanusha has the shortest road network, with only 116 km (8%). Mahottari, Siraha, Parsa and Bara have moderate road lengths of 200 km (13%), 181 km (12%), 178 km (12%), and 148 km (10%) respectively.

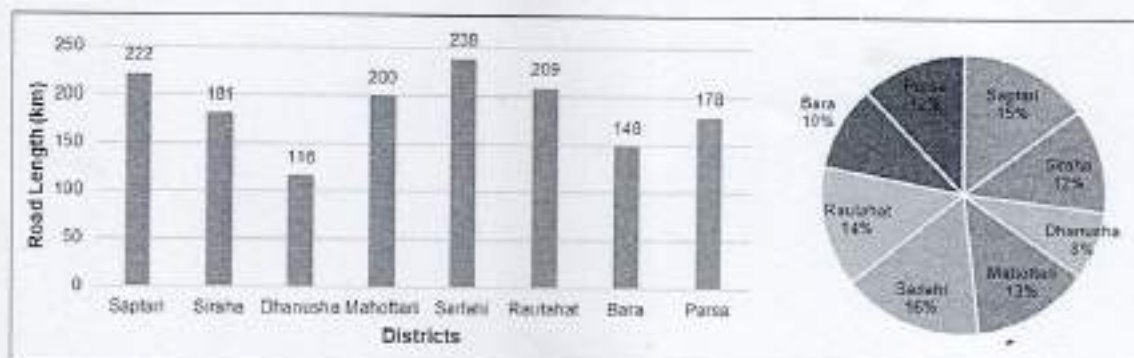

Figure 2-16: Distribution of PH in districts

ii. Provincial Road

Provincial Road is a low-volume road, compared to the provincial highway, and links the municipality headquarters with the district headquarters or Provincial or National highway or the road, not included in former feeder roads (FRN), that links border checkpoints with India and China, and the road designated by province as provincial roads. Provincial Secondary Highway along with other roads defined in "Provincial Roads Act 2076 BS" has been included in Provincial Road.

A total of 297 link roads and road sections of PR were identified within the province boundary totalling 2746.85 Km. The list of PRs identified is attached in Appendix A. The distribution of PRs in districts of Madhesh Province has been shown in Figure 2-17. Rautahat has the longest PR network, spanning 421.2 km (15%), followed by Saptari with 385.3 km (14%). Siraha, Sarlahi, Dhanusha and Bara also has a significant road length of 367.7 km (13%), 360.1 km (13%), 358.6 km (13%) and 345 km (13%) respectively. Parsa has the shortest road network with 188.8 km (7%).

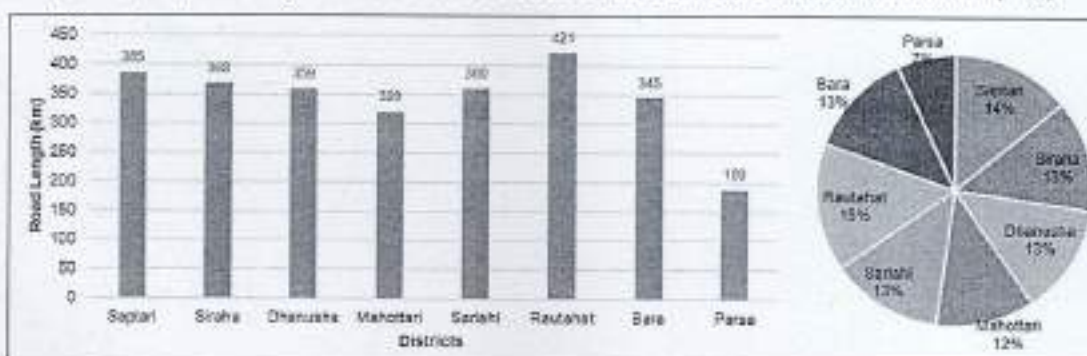

Figure 2-17: Distribution of PR in districts

2.3.2 Provincial Road Coding

A simplified approach is used for road coding which is discussed as follows:

- Provincial Highways are coded with PH-XX-YYY. The "PH" denotes the provincial highway, "XX" denotes the province abbreviation and "YYY" is a serial number for each provincial highway in a province. e.g., PH-MH-001 represents the province highway in Madhesh Province for serial no. 001.
- Provincial Roads are coded with PR-XX-YYY which is similar to the Provincial highways. e.g., PR-MH-001 represents the province road in Madhesh Province for serial no. 001.
- Road sections have been denoted using a suffix, e.g. PH-XX-YYY-ZZ where "ZZ" is the section serial and starts with 01 and can go up to 99.

2.3.3 Road Inventory

A preliminary road surface identification was done using Google Earth imagery which was later verified and corrected by Infrastructure Development Offices (IDOs) in each district. Hence, the present inventory is the verified and corrected inventory from IDO in each district. The approved inventory details have been attached in appendix.

The present inventory includes:

- Pavement Types: Blacktop (BT) includes pavement types of Asphalt Concrete (AC), Double Bituminous Surface Treatment (DBST) and OTTA SEAL. Also, concrete pavement (CP) has been included in the BT category. In case of new alignment, new Construction (NC) is used.

- b) Surface and Drainage Conditions are assumed to be only fair.
 c) All-weather access is provided for BT roads, Fair Weather access for Gravel (GR) and Earthen (ER) roads and no access for NC.

For preliminary road inventory, an online software installable in computer was developed which linked the collected PRN and viewed the latest Google imagery in highest resolution possible. This software deduced chainage of all the identified roads and facilitated measurement of road widths too. The surface types determined by this software serves directly into the website <https://prtmp.softavi.com/>. A screenshot of the software interface for road inventory has been shown in Figure 2-18.

Figure 2-18: Screenshot of software developed for road inventory

A sample of pavement status deduced in each road has been presented in Table 2-1, and the details of pavement status in all the identified PRN have been included in Appendix B.

Table 2-1: Sample of Pavement Status in each road

S.N.	Road Code	Total Length (Km)	Pavement Type			
			BT	GR	ER	NC
1	PH-MH-001-01	18.60	2.00	16.60	0.00	0.00
2	PH-MH-001-02	44.75	0.70	44.05	0.00	0.00
3	PH-MH-001-03	46.76	2.00	40.55	4.21	0.00
4	PH-MH-001-04	7.15	0.50	6.65	0.00	0.00
5	PH-MH-001-05	3.97	0.50	3.47	0.00	0.00
6	PH-MH-001-06	26.30	5.00	21.30	0.00	0.00
7	PH-MH-001-07	46.61	13.00	30.61	3.00	0.00
8	PH-MH-001-08	9.90	9.90	0.00	0.00	0.00
9	PH-MH-001-09	16.05	15.50	0.30	0.25	0.00
10	PH-MH-001-10	25.17	9.00	16.17	0.00	0.00
11	PH-MH-001-11	10.30	5.71	2.00	2.59	0.00
12	PH-MH-001-12	34.54	17.30	17.24	0.00	0.00
13	PH-MH-002	26.38	3.00	23.38	0.00	0.00

Note:

BT: Blacktop; ER: Earthened; GR: Gravelled; NC: New Construction

The summary of pavement status identified has been shown in Figure 2-19. It is evident from the figure that bituminous roads have the highest length in PH while gravelled roads have the highest length in PR. In both PH and PR, there seems to a need of new construction of roads.

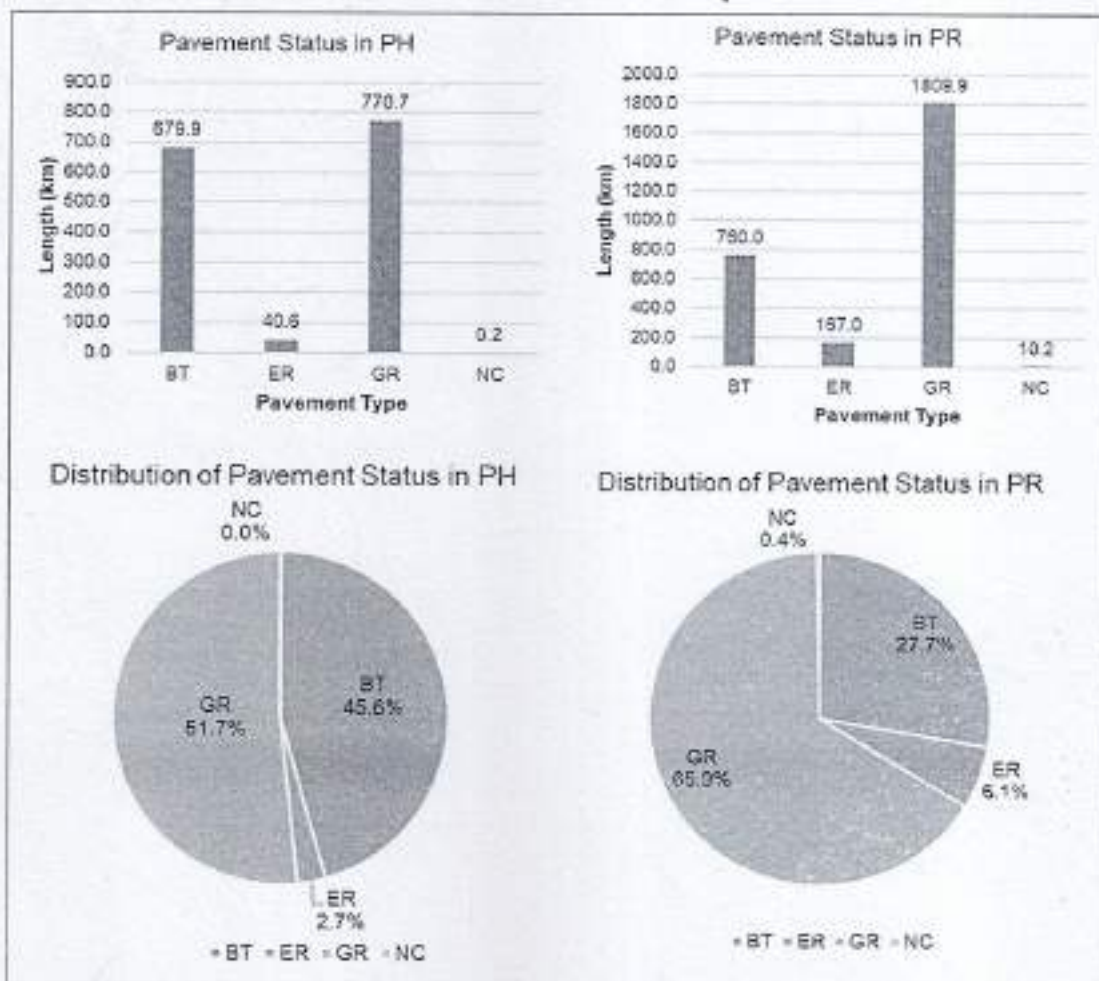

Figure 2-19: Pavement Status at Present

The pavement status of the identified PRN in districts is shown in Figure 2-20. The total length of blacktopped roads across all districts is 1439.84 km, with Rautahat having the highest at 309.56 km (21%) and Saptari the lowest at 69.8 km (5%). The total length of gravel roads is 2580.65 km, with Saptari leading at 537.08 km (21%) and Parsa having the least at 183.02 km (7%). The total length of earthen roads is 207.61 km, with Siraha having the highest at 69.08 km (33%) and Saptari the lowest at 0 km (0%). In terms of new construction, a total of 10.38 km is needed, with Parsa requiring the most at 6.83 km (66%) and Sarlahi requiring 3.55 km (34%). These figures highlight the varying levels of existing infrastructure and the differing needs for road development across the districts.

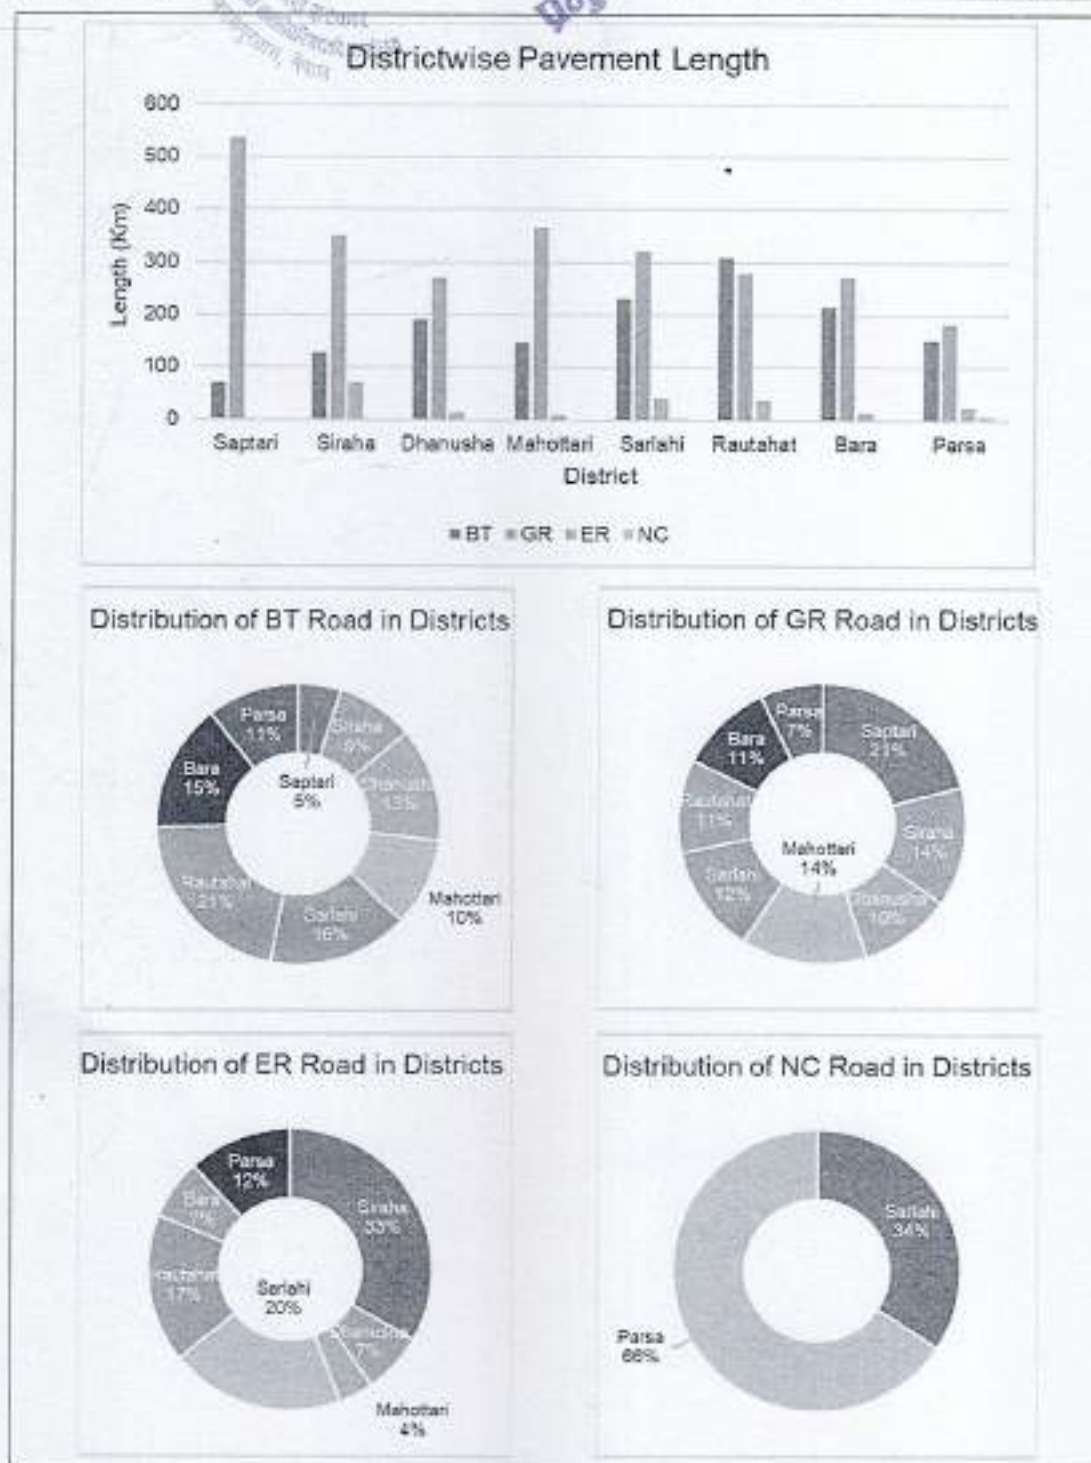

Figure 2-20: Pavement status in districts

2.3.4 Bridge Inventory

A detailed inventory needs to be carried out for all the identified bridges and new crossings. At present, the bridge status has been identified using Google Earth imagery which is an approximate method. The present bridge inventory includes:

- Existing Bridges: This includes all the bridges with clear span greater than 6m. All motorable RCC, Steel truss, suspension, etc. have been included in this.
- New Crossing: This includes the streams requiring the construction of bridges. All streams requiring crossings with span greater than 6m have been included here.

A sample of bridge inventory done in each road has been presented in Table 2-2, and the bridge status details have been included in Appendix C.

Table 2-2: Sample of Bridge Inventory done in each road

SN	Road Code	Length (m)	Stream Name	Existing/New Crossing	Type
1	PH-MH-001-01	12	Mahuli Dhar	Existing	RCC
2	PH-MH-001-01	35	Jita Nadi Bridge (Pakari, Mahadeva)	Existing	RCC
3	PH-MH-001-02	25	Koshi Pump Nahar	New Crossing	
4	PH-MH-001-02	10	Canal	Existing	RCC
5	PH-MH-001-02	15	Canal	Existing	RCC
6	PH-MH-001-02	30	Ghordana Nadi	Existing	RCC
7	PH-MH-001-02	20	Mutani Nadi	Under Construction	RCC
8	PH-MH-001-02	15	Judi Tarsari Nadi	New Crossing	
9	PH-MH-001-02	50	Devdhar Nadi	New Crossing	
10	PH-MH-001-02	35	Lakeshwar Nadi	New Crossing	
11	PH-MH-001-02	140	Khadak Nadi	New Crossing	
12	PH-MH-001-02	40	Chapin Dhar	New Crossing	
13	PH-MH-001-02	60	Bairago Nadi	New Crossing	

A sample of bridge status deduced in each road has been presented in Table 2-3, and the details bridge status in all the identified PRN have been included in Appendix C.

Table 2-3: Sample of Bridge Status in each road

SN	Road Code	Existing Bridge		Requiring New Construction	
		Number	Length (m)	Number	Length (m)
1	PH-MH-001-01	2	47	0	0
2	PH-MH-001-02	4	75	9	785
3	PH-MH-001-03	7	239	2	60
4	PH-MH-001-04	2	23	0	0
5	PH-MH-001-05	0	0	0	0
6	PH-MH-001-06	3	515	3	375
7	PH-MH-001-07	5	105	4	735
8	PH-MH-001-08	3	500	0	0
9	PH-MH-001-09	4	288	0	0
10	PH-MH-001-10	9	312	0	0
11	PH-MH-001-11	1	60	0	0
12	PH-MH-001-12	11	396	2	240
13	PH-MH-002	3	92	2	43

The number and length of identified bridges have been shown in Figure 2-21. It has been found that there are 222 existing bridges (10,116.5 m in length, 75% of total length) and 32 streams require construction of new bridges (3,425m in length, 25% of total length) in PH. Also, it has been found that there are 232 existing bridges (12,406m in length, 60% of total length) and 121 streams require construction of new bridges (8,400m in length, 40% of total length) in PR. In conclusion, PH has a higher proportion of existing bridges compared to PR, with 75% of its total bridge length already in place. Conversely, PR has a greater need for new bridge construction, with 40% of its total bridge length still required. This indicates that PH's infrastructure is more developed in terms of existing bridges, while PR faces a greater demand for new bridge construction to meet its infrastructural needs.

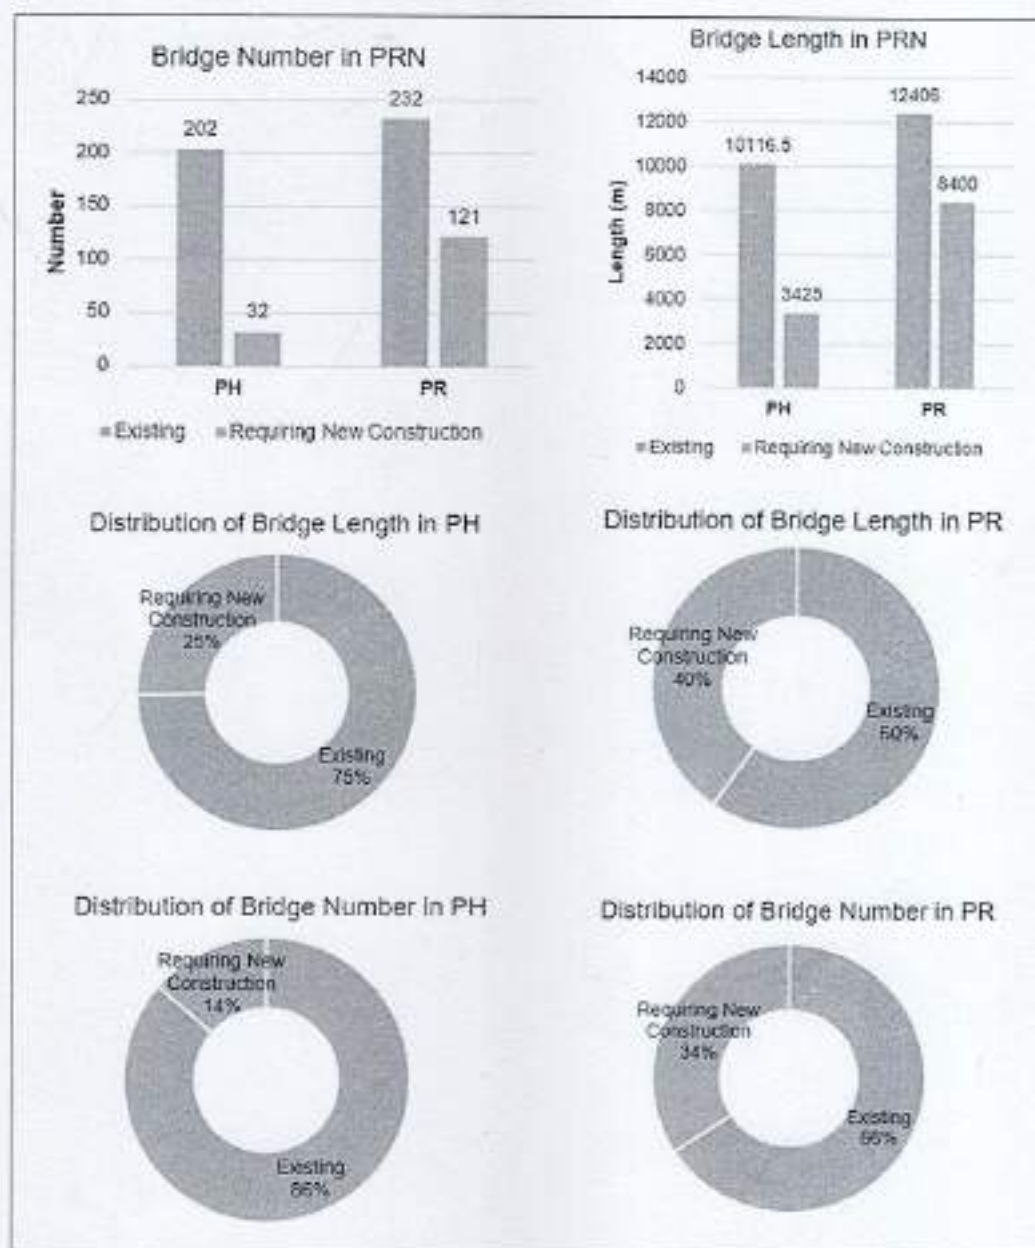

Figure 2-21: Number and Length of identified Bridges

The distribution of existing bridges and streams requiring new construction (New Crossing) across the districts of Madhesh province has been shown in Figure 2-22. It is found that Rautahat has the highest length of existing bridges (6531m, 29%) while Saptari has the least length of existing bridges (1,881 m, 8%) in the identified PRN. Moreover, the highest length of streams requiring new construction of bridge is found in Sarlahi (2,900m, 24%) while the least length is found in Dhanusha (470m, 4%). The data reveals a significant disparity in bridge infrastructure within the districts of Madhesh province.

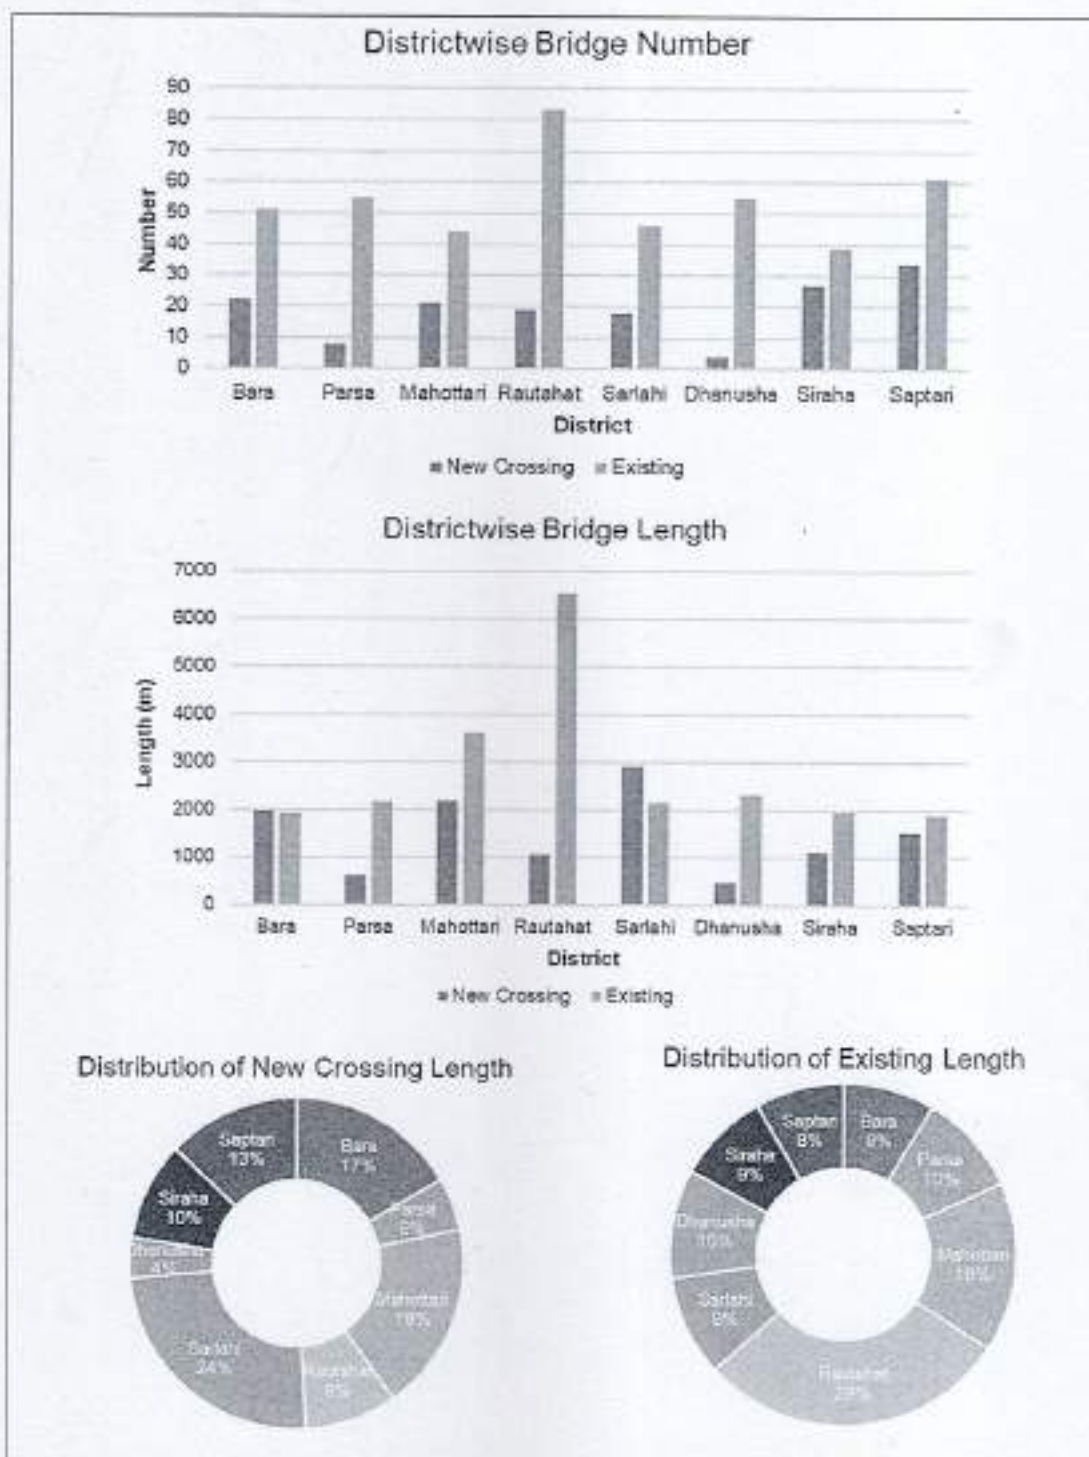

Figure 2-22: District wise Distribution of Bridges

Sample maps of bridges identified within Madhesh province have been shown in Figure 2-23. These bridges can be viewed and printed from the website <https://prtmp.softavi.com/>.

Table C3: Bridge Inventory Details in Provincial Road Network

SN	RoadCode	Chainage	Length (m)	Stream Name	Existing/New Crossing	Type
1	PH-MH-001-01	8+850	12	Mahuli Dhar	Existing	RCC
2	PH-MH-001-01	16+230	35	Jha Nadi Bridge (Pakar, Mahadeva)	Existing	RCC
3	PH-MH-001-02	3+340	25	Koshi Pump Nahar	New Crossing	
4	PH-MH-001-02	7+210	10	Canal	Existing	RCC
5	PH-MH-001-02	7+600	15	Canal	Existing	RCC
6	PH-MH-001-02	7+820	30	Ghordana Nadi	Existing	RCC
7	PH-MH-001-02	13+930	20	Mutani Nadi	Under Construction	RCC
8	PH-MH-001-02	17+100	15	Judi Tarsari Nadi	New Crossing	
9	PH-MH-001-02	22+450	50	Devdhar Nadi	New Crossing	
10	PH-MH-001-02	23+000	35	Lakeshwar Nadi	New Crossing	
11	PH-MH-001-02	27+200	140	Khadak Nadi	New Crossing	
12	PH-MH-001-02	32+850	40	Chapin Dhar	New Crossing	
13	PH-MH-001-02	35+430	60	Bairaga Nadi	New Crossing	
14	PH-MH-001-02	37+330	15	Bihul Nadi	New Crossing	
15	PH-MH-001-02	44+300	405	Bhutahi Balan Nadi	New Crossing	
16	PH-MH-001-03	18+470	8	Trishula Nadi	Existing	RCC
17	PH-MH-001-03	20+245	15	Kataniya Nadi Causeway	Existing	RCC
18	PH-MH-001-03	21+700	35	Gagan Nadi	New Crossing	
19	PH-MH-001-03	30+130	25	Mainawati Nadi	New Crossing	
20	PH-MH-001-03	35+540	30	Siraha Kalyanpur Na. Paa. Wada No. 10 Lohazara Nadi ma Pool	Existing	RCC
21	PH-MH-001-03	36+230	9	Kamala Canal	Existing	RCC
22	PH-MH-001-03	39+390	77	Ghumi Khola	Existing	RCC
23	PH-MH-001-03	44+080	60	Bataha Khola	Existing	RCC
24	PH-MH-001-03	44+870	40	Sukla Khola	Existing	RCC
25	PH-MH-001-04	4+540	12	Canal	Existing	RCC
26	PH-MH-001-04	6+530	11	Khola	Existing	RCC
27	PH-MH-001-06	1+700	300	Marsha Nadi	Existing	RCC
28	PH-MH-001-06	4+140	55	Bhutaha Khola	Existing	RCC
29	PH-MH-001-06	6+070	210	Rato Nadi	New Crossing	
30	PH-MH-001-06	7+200	15	Rato Nadi	New Crossing	
31	PH-MH-001-06	11+100	160	Jangaha Nadi	Existing	RCC
32	PH-MH-001-06	23+900	150	Dulan Nadi	New Crossing	
33	PH-MH-001-07	0+000	210	Bake Nadi	New Crossing	
34	PH-MH-001-07	9+950	35	Saptaha Nadi	New Crossing	
35	PH-MH-001-07	21+700	190	Jhim Nadi	New Crossing	
36	PH-MH-001-07	23+010	30	Chitain Khola	Existing	Steel Truss
37	PH-MH-001-07	28+290	20	Dhengraha Nala	Existing	RCC
38	PH-MH-001-07	31+750	300	Lokhandehi Khola	New Crossing	
39	PH-MH-001-07	34+400	10	Nala	Existing	RCC
40	PH-MH-001-07	37+000	20	Pathaliya Nala	Existing	RCC
41	PH-MH-001-07	39+570	25	Nala	Existing	RCC
42	PH-MH-001-08	0+860	470	Bagmati River Bridge	Existing	RCC
43	PH-MH-001-08	6+190	10	Bagmati Irrigation Canal	Existing	RCC
44	PH-MH-001-08	8+580	20	Chadi Nala	Existing	RCC
45	PH-MH-001-09	0+480	10	Nala	Existing	RCC
46	PH-MH-001-09	0+940	8	Jhajh Canal	Existing	RCC
47	PH-MH-001-09	4+810	20	Jalaiya Nala	Existing	RCC
48	PH-MH-001-09	9+430	250	Bekaiya Nadi	Existing	RCC
49	PH-MH-001-10	0+010	25	Bhola Khola	Existing	RCC
50	PH-MH-001-10	3+150	55	Jamuni Nadi	Existing	RCC
51	PH-MH-001-10	4+780	8	Budha Nadi	Existing	RCC
52	PH-MH-001-10	6+660	27	Tiyar Nadi	Existing	RCC
53	PH-MH-001-10	8+970	25	Thelahi Nadi	Existing	RCC
54	PH-MH-001-10	13+510	10	Pasaha Khola	Existing	RCC
55	PH-MH-001-10	13+770	112	Pasaha Khola	Existing	RCC
56	PH-MH-001-10	16+270	15	Gandak Main Canal	Existing	RCC
57	PH-MH-001-10	21+140	35	Bangeri Khola	Existing	RCC
58	PH-MH-001-11	8+720	60	Sirsiya Nadi	Existing	RCC
59	PH-MH-001-12	0+000	10	Kiyasot Khola	Existing	RCC
60	PH-MH-001-12	2+950	28	Baugai River Bridge	Existing	RCC
61	PH-MH-001-12	7+825	60	Amadevi Khola Bridge	Existing	RCC
62	PH-MH-001-12	9+200	25	Amadevi Khola	Existing	RCC
63	PH-MH-001-12	10+760	45	Phanti Khola	Existing	RCC
64	PH-MH-001-12	11+330	20	Phanti Khola	Existing	RCC
65	PH-MH-001-12	12+750	20	Nala	Existing	RCC
66	PH-MH-001-12	15+100	70	Mahadev Khola	Existing	RCC
67	PH-MH-001-12	17+560	28	Argama Nadi	Existing	RCC
68	PH-MH-001-12	18+280	65	Manabodhi Khola	Existing	RCC
69	PH-MH-001-12	21+170	20	Jamuniya Nadi	New Crossing	
70	PH-MH-001-12	30+800	220	Bhaluwahi Nadi	New Crossing	
71	PH-MH-001-12	33+680	25	Imriti Nadi	Existing	RCC
72	PH-MH-002	7+130	18	Kaliya Dhar	New Crossing	

Table C3: Bridge Inventory Details in Provincial Road Network

SN	RoadCode	Chainage	Length (m)	Stream Name	Existing/New Crossing	Type
